ISO 16014-3:2019 (E)

Plastics — Determination of average molecular weight and molecular weight distribution of polymers using size-exclusion chromatography — Part 3: Low-temperature method

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Reagents

6 Apparatus

7 Procedure

- 7.1 Preparation of solutions of molecular weight standards
- 7.2 Preparation of sample solutions
- 7.3 Preparation of solutions for column performance evaluation
- 7.4 Setting up the apparatus
- 7.5 Operating parameters
- 7.5.1 Flow rate
- 7.5.2 Injection masses and injection volumes
- 7.5.3 Column temperature
- 7.5.4 Detector sensitivity
- 7.6 Number of determinations

8 Data acquisition and processing

9 Expression of results

10 Precision

- 10.1 General
- 10.2 Experimental conditions
- 10.3 Results of interlaboratory tests

11 Test report

Annex A (informative) Further information on applicability of method

Annex B (informative) Further information on reagents

- B.1 Examples of suitable eluents
- B.2 Examples of column evaluation reagents
- B.3 Narrow molecular weight distribution standards

Annex C (informative) Further information on interlaboratory tests

- C.1 Data from 1st round-robin test (polystyrene samples)
- C.2 Data from 2nd round-robin test [poly(methyl methacrylate samples)]
- C.3 Data from 3rd round-robin test (polyacrylonitrile samples)
