ISO/TR 21960:2020-02 (E)

Plastics - Environmental aspects - State of knowledge and method ologies

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 End-use applications of plastic materials and its relevance to the environment 4
4.1 General 4
4.2 Packaging 8
4.3 Building and construction 9
4.4 Mobility and transportation, electrical and electronics 9
4.5 Agriculture 9

5 Occurrence of plastics in environmental matrix and biota 10
5.1 General 10
5.2 Water systems 10
5.2.1 Marine waters 10
5.2.2 Fresh waters 11
5.3 Sediments 11
5.3.1 Marine sediments 11
5.3.2 Fresh water sediments 12
5.4 Sludge 12
5.5 Soils 13
5.5.1 Terrestrial systems 13
5.5.2 Beaches 13
5.6 Air 14
5.7 Terrestrial fresh water and marine biota 14

6 Testing methods 15
6.1 General 15
6.2 Sampling 15
6.2.1 General 15
6.2.2 Water (aquatic systems) 16
6.2.3 Sediment, sludge and soil (solid systems) 17
6.2.4 Air 18
6.2.5 Biota 18
6.2.6 Statistical considerations for sampling 19
6.3 Sample preparation 19
6.3.1 General 19
6.3.2 Physical preparation methods 20
6.3.3 Chemical preparation methods 21
6.3.4 Enzymatic preparation 21
6.4 Analysis 21
6.4.1 General 21
6.4.2 Spectroscopic analysis methods 22
6.4.3 Thermo-analytic methods 23
6.4.4 Chemical extraction methods 23

7 Methodology of entry pathways (Monitoring) 25

8 Basics of environmental assessments 27

9 Recommendations for the development of standards 28
