ISO 10352:2020 (E)

Fibre-reinforced plastics — Moulding compounds and prepregs — Determination of mass per unit area and fibre mass per unit area

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

4.1 Determination of mass per unit area
4.2 Determination of fibre mass per unit area
4.2.1 Method A: Extraction in Soxhlet-type apparatus
4.2.2 Method B: Extraction by immersion in solvent in a beaker
4.2.3 Method C: Decomposition by loss on ignition
4.2.4 Method D: Extraction by wet combustion
4.2.5 Method E: Method by calculation

5 Apparatus and reagents

5.1 General
5.2 For Method A
5.3 For Method B
5.4 For Method C
5.5 For Method D

6 Conditioning and testing

6.1 Conditioning
6.1.1 Materials for which no conditioning is required
6.1.2 Conditioning of material stored at ambient temperature
6.1.3 Conditioning of material stored at below ambient temperature
6.2 Testing
6.2.1 Test atmosphere
6.2.2 Time interval between conditioning and testing
6.2.2.1 Materials not requiring conditioning
6.2.2.2 Materials requiring conditioning

7 Test specimens

7.1 Shape and dimensions
7.2 Number
7.3 Preparation

8 Procedure

8.1 Determination of mass per unit area
8.1.1 Materials made without using a solvent
8.1.2 Materials made using a solvent
8.2 Determination of fibre mass per unit area
8.2.1 Method A: Extraction in Soxhlet-type apparatus
8.2.2 Method B: Extraction by immersion in solvent
8.2.3 Method C: Decomposition by loss on ignition
8.2.4 Method D: Extraction by wet combustion
8.2.5 Method E: Method by calculation

9 Expression of results

9.1 Mass per unit area

9.1.1 Materials made without using a solvent
9.1.2 Materials made using a solvent
9.2 Fibre mass per unit area
9.2.1 Method A: Extraction in Soxhlet-type apparatus
9.2.2 Method B: Extraction by immersion in solvent
9.2.3 Method C: Extraction by decomposition by loss on ignition
9.2.4 Method D: Extraction by wet combustion
9.2.5 Method E: Method by calculation

10 Precision

10.1 Mass per unit area
10.2 Fibre mass per unit area

11 Test report

Page count: 15
