

DIN CEN ISO/TR 21960:2021-02 (E)

Plastics - Environmental aspects - State of knowledge and methodologies (ISO/TR 21960:2020); English version CEN ISO/TR 21960:2020

Contents

	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 End-use applications of plastic materials and its relevance to the environment	4
4.1 General	4
4.2 Packaging	8
4.3 Building and construction	9
4.4 Mobility and transportation, electrical and electronics	9
4.5 Agriculture	9
5 Occurrence of plastics in environmental matrix and biota	10
5.1 General	10
5.2 Water systems	10
5.2.1 Marine waters	10
5.2.2 Fresh waters	11
5.3 Sediments	11
5.3.1 Marine sediments	11
5.3.2 Fresh water sediments	12
5.4 Sludge	12
5.5 Soils	13
5.5.1 Terrestrial systems	13
5.5.2 Beaches	13
5.6 Air	14
5.7 Terrestrial fresh water and marine biota	14
6 Testing methods	15
6.1 General	15
6.2 Sampling	15
6.2.1 General	15
6.2.2 Water (aquatic systems)	16
6.2.3 Sediment, sludge and soil (solid systems)	17
6.2.4 Air	18
6.2.5 Biota	18
6.2.6 Statistical considerations for sampling	19
6.3 Sample preparation	19
6.3.1 General	19
6.3.2 Physical preparation methods	20
6.3.3 Chemical preparation methods	21
6.3.4 Enzymatic preparation	21
6.4 Analysis	21
6.4.1 General	21
6.4.2 Spectroscopic analysis methods	22
6.4.3 Thermo-analytic methods	23
6.4.4 Chemical extraction methods	23

7	Methodology of entry pathways (Monitoring)	25
8	Basics of environmental assessments	27
9	Recommendations for the development of standards	28
	Bibliography	30
