

DIN CEN ISO/TR 21960:2021-02 (E)

Plastics - Environmental aspects - State of knowledge and methodologies (ISO/TR 21960:2020); English version CEN ISO/TR 21960:2020

Contents

| | Page |
|---|-----------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 End-use applications of plastic materials and its relevance to the environment | 4 |
| 4.1 General | 4 |
| 4.2 Packaging | 8 |
| 4.3 Building and construction | 9 |
| 4.4 Mobility and transportation, electrical and electronics | 9 |
| 4.5 Agriculture | 9 |
| 5 Occurrence of plastics in environmental matrix and biota | 10 |
| 5.1 General | 10 |
| 5.2 Water systems | 10 |
| 5.2.1 Marine waters | 10 |
| 5.2.2 Fresh waters | 11 |
| 5.3 Sediments | 11 |
| 5.3.1 Marine sediments | 11 |
| 5.3.2 Fresh water sediments | 12 |
| 5.4 Sludge | 12 |
| 5.5 Soils | 13 |
| 5.5.1 Terrestrial systems | 13 |
| 5.5.2 Beaches | 13 |
| 5.6 Air | 14 |
| 5.7 Terrestrial fresh water and marine biota | 14 |
| 6 Testing methods | 15 |
| 6.1 General | 15 |
| 6.2 Sampling | 15 |
| 6.2.1 General | 15 |
| 6.2.2 Water (aquatic systems) | 16 |
| 6.2.3 Sediment, sludge and soil (solid systems) | 17 |
| 6.2.4 Air | 18 |
| 6.2.5 Biota | 18 |
| 6.2.6 Statistical considerations for sampling | 19 |
| 6.3 Sample preparation | 19 |
| 6.3.1 General | 19 |
| 6.3.2 Physical preparation methods | 20 |
| 6.3.3 Chemical preparation methods | 21 |
| 6.3.4 Enzymatic preparation | 21 |
| 6.4 Analysis | 21 |
| 6.4.1 General | 21 |
| 6.4.2 Spectroscopic analysis methods | 22 |
| 6.4.3 Thermo-analytic methods | 23 |
| 6.4.4 Chemical extraction methods | 23 |

| | | |
|----------|---|-----------|
| 7 | Methodology of entry pathways (Monitoring) | 25 |
| 8 | Basics of environmental assessments | 27 |
| 9 | Recommendations for the development of standards | 28 |
| | Bibliography | 30 |
