## Plastics - Determination of drawing characteristics of thermoplastics in the molten state

---

| <b>Contents</b> |   | <b>Page</b> |
|-----------------|---|-------------|
|                 | <b>Foreword</b> .....   | <b>iv</b>   |
| <b>1</b>        | <b>Scope</b> .....  | <b>1</b>    |
| <b>2</b>        | <b>Normative references</b> .....   | <b>1</b>    |
| <b>3</b>        | <b>Terms and definitions</b> .....  | <b>1</b>    |
| <b>4</b>        | <b>Principle</b> .....  | <b>3</b>    |
| <b>5</b>        | <b>Apparatus</b> .....  | <b>3</b>    |
| 5.1             | Apparatus for heating the polymer and forming the extrudate.....              | 3           |
| 5.1.1           | General.....  | 3           |
| 5.1.2           | Capillary extrusion rheometer.....  | 3           |
| 5.1.3           | Extruder.....   | 4           |
| 5.2             | Apparatus for drawing the polymer extrudate.....                              | 5           |
| 5.2.1           | Drawing unit.....   | 5           |
| 5.2.2           | Drawing unit design.....  | 5           |
| 5.3             | Data-acquisition system.....  | 7           |
| <b>6</b>        | <b>Calibration</b> .....  | <b>7</b>    |
| 6.1             | General.....  | 7           |
| 6.2             | Test temperature.....   | 7           |
| 6.3             | Capillary or rod die.....   | 7           |
| 6.4             | Drawing-force transducer.....   | 7           |
| 6.5             | Drawing velocity and drawing acceleration.....                                | 7           |
| 6.6             | Drawing length.....   | 7           |
| <b>7</b>        | <b>Sampling</b> .....   | <b>8</b>    |
| <b>8</b>        | <b>Procedure</b> .....  | <b>8</b>    |
| 8.1             | Cleaning the apparatus.....   | 8           |
| 8.2             | Rheometer or extruder preparation.....  | 8           |
| 8.3             | Loading the capillary rheometer barrel.....                                   | 9           |
| 8.4             | Preheating.....   | 9           |
| 8.5             | Running the extruder.....   | 10          |
| 8.6             | Preliminary checks of the extrudates.....                                     | 10          |
| 8.6.1           | Absence of defects.....   | 10          |
| 8.6.2           | Check on drawing down under gravity.....                                      | 10          |
| 8.7             | Determination of the extrudate behaviour.....                                 | 12          |
| 8.7.1           | Determination of the mean velocity.....                                       | 12          |
| 8.7.2           | Determination of the drawing force as a function of the drawing velocity..... | 12          |
| 8.7.3           | Measurement of melt strength.....   | 13          |
| <b>9</b>        | <b>Calculation and expression of results</b> .....                            | <b>14</b>   |
| 9.1             | Initial cross-sectional area of the extrudate.....                            | 14          |
| 9.2             | Initial velocity.....   | 14          |
| 9.3             | Drawing velocities.....   | 14          |
| 9.4             | Drawing forces.....   | 15          |
| 9.5             | Draw ratio.....   | 15          |
| <b>10</b>       | <b>Precision</b> .....  | <b>15</b>   |
| <b>11</b>       | <b>Test report</b> .....  | <b>15</b>   |
|                 | <b>Bibliography</b> .....   | <b>17</b>   |
