DIN EN ISO 14852:2021-10 (E)

Determination of the ultimate aerobic biodegradability of plastic materials in an aqueous medium - Method by analysis of evolved carbon dioxide (ISO 14852:2021)

Contents

Page

European foreword 3

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Termsanddefinitions 6

4 Principle 8

5 Test environment 9

6 Reagents 9

7 Apparatus 11

8 Procedure 12
8.1 Test material 12
8.2 Reference material 12
8.3 Preparation of the inoculum 12
8.3.1 General 12
8.3.2 Inoculum from wastewater-treatment plants 13
8.4 Test 13

9 Calculation and expression of results 15
9.1 Calculation 15
9.1.1 Theoretical amount of carbon dioxide evolved by the test material 15
9.1.2 Percentage biodegradation from CO2 evolution 15
9.2 Expression and interpretation of results 15

10 Validity of results 16

11 Test report 16

Annex A (informative) Principle of a system for measuring evolved carbon dioxide (example) 18

Annex B (informative) Examples of methods for the determination of evolved carbon dioxide 19

Annex C (informative) Example of the determination of a carbon balance 21

Annex D (informative) Example of a determination of the amount of water insoluble polymer remaining at the end of a biodegradation test and the molecular mass of the polymer 23

Bibliography 24
