# DIN EN 17410:2021-11 (E)

## Plastics - Controlled loop recycling of PVC-U profiles from windows and doors

## Contents

Page

European foreword ....3

Introduction ....4

1 Scope ....5

2 Normative references ....5

3 Terms and definitions ....6

4 Methodology, Procedures and Requirements ....9
4.1 Life cycle stages of PVC windows and doors ....9
4.2 Controlled Loop Model and Life Cycle Stages ....10
4.3 Material Flow along the loop ....10
4.4 Definition of quality relevant stages in the controlled loop ....12
4.5 Requirements, material characteristics and related test methodologies ....12
4.6 End of Waste status ....14
4.7 Definition of traceability instruments ....15
4.8 Quality assurance ....15
4.9 Design for recycling ....16

Annex A (informative) PVC window/door profiles and window/door fabrication -- Description of PVC material flow (virgin material, internally reused material and recycled material) in a controlled loop ....17

Annex B (informative) Characterization of PVC Recyclates for PVC Profiles ....18

Annex C (informative) Optional traceability characteristics of recyclate PVC-U (rPVC-U) for PVC profiles ....19
