Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2

5 Apparatus 3
5.1 Extrusion plastometer 3
5.2 Accessory equipment 7
5.2.1 General 7
5.2.2 Equipment for procedure A (see Clause 8) 8
5.2.3 Equipment for procedure B (see Clause 9): Piston displacement transducer/ timer 8

6 Test sample 8
6.1 Sample form 8
6.2 Conditioning 9

7 Temperature verification, cleaning and maintenance of the apparatus 9
7.1 Verification of the temperature control system 9
7.1.1 Verification procedure 9
7.1.2 Material used during temperature verification 10
7.2 Cleaning the apparatus 10
7.3 Vertical alignment of the instrument 10

8 Procedure A: mass-measurement method 10
8.1 Selection of temperature and load 10
8.2 Cleaning 11
8.3 Selection of sample mass and charging the cylinder 11
8.4 Measurements 12
8.5 Expression of results 13
8.5.1 General 13
8.5.2 Expression of results: standard die 13
8.5.3 Expression of results: half size die 13

9 Procedure B: displacement-measurement method 14
9.1 Selection of temperature and load 14
9.2 Cleaning 14
9.3 Minimum piston displacement distance 14
9.4 Selection of sample mass and charging the cylinder 14
9.5 Measurements 14
9.6 Expression of results 15
9.6.1 General 15
9.6.2 Expression of results: standard die 15
9.6.3 Expression of results: half size die 16

10 Flow rate ratio 16

11 Precision 17

12 Test report 17

Annex A (normative) Test conditions for MFR and MVR determinations 19

Annex B (informative) Conditions specified in International Standards for the determination of the melt flow rate of thermoplastic materials 21

Annex C (informative) Device and procedure for preforming a compacted charge of material by compression 22

Annex D (informative) Precision data for polypropylene obtained from an intercomparison of MFR and MVR testing 25

Bibliography 26
