DIN 53350:2022-12 (E)

Plastics films and sheeting - Determination of stiffness in bending - Two-point method (Ohlsen approach)

Contents

Page

Foreword 3

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Apparatus 8
4.1 Bending stiffness testing device 8
4.2 Thickness measuring device 8
4.2.1 Film 8
4.2.2 Coated products 9

5 Samples and test pieces 9
5.1 Sampling and pre-treatment 9
5.2 Shape and dimensions of test pieces 9
5.3 Number of test pieces 9

6 Procedure 9
6.1 Thickness measurement 9
6.1.1 Film 9
6.1.2 Coated products 9
6.2 Bending test 9

7 Evaluation 10
7.1 General 10
7.2 Determination of characteristic values (using the bending force) 10
7.2.1 General 10
7.2.2 Calculation of bending stiffness S in N · mm2 (using the bending force) 10
7.2.3 Calculation of the bending modulus EB in N/mm2 (using the bending force) 10
7.3 Determining characteristic values (according to Ohlsen) 11
7.3.1 General 11
7.3.2 Calculation of bending stiffness S in N · mm2 (acc. to Ohlsen) 11
7.3.3 Calculation of the bending modulus EB in N/mm2 (acc. to Ohlsen) 11

8 Test report 11

Annex A (normative) Classical test apparatus and test procedure according to Ohlsen 13

Bibliography 15
