ISO/TS 16943:2023-11 (E)

Thermoplastic pipes for the conveyance of fluids - Inspection of polyethylene electrofusion socket joints using phased array ultrasonic testing

Contents

Page

Foreword ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 General **3**

5 Information required prior to testing **3**
5.1 Items to be defined for the procedure development 3
5.2 Specific information required by the operator before testing 4
5.3 Written test procedure 4

6 Personnel qualifications **4**

7 Equipment **4**
7.1 General 4
7.2 Ultrasonic instrument and display 4
7.3 Ultrasonic probes 5
7.4 Scanning mechanisms 5
7.5 Couplant 5

8 Range and sensitivity settings **5**
8.1 Settings 5
8.1.1 General 5
8.1.2 Range setting — test volume 5
8.1.3 Sensitivity setting 7
8.2 Reference sample 7
8.2.1 General 7
8.2.2 Reference block 8
8.2.3 Electrofusion socket fitting 8
8.3 Checking of the settings 8

9 Equipment checks **8**

10 Test procedure **8**
10.1 Procedure qualification 8
10.2 Scan increment 10
10.3 Geometry of the fusion joint tested 10
10.4 Preparation of scanning surfaces 10
10.5 Temperature of fusion joint tested 10
10.6 Testing 10
10.7 Data storage 11

11 Evaluation and analysis of test data **11**
11.1 General 11
11.2 Assessing the quality of the test data 11
11.3 Identification of relevant indications 11
11.4 Classification of relevant indications 11
11.5 Determination of location and size of indications 12
11.6 Assessment of indications 12

12 Test report **12**

Annex A (informative) **Examples of phased array images** **14**

Annex B (informative) **Example of a reference block** **17**

Annex C (informative) **Example procedures for producing imperfections in electrofusion socket joints [17]** **19**

Annex D (informative) **Relationship between heating time and MFZ thickness and detection using phased array ultrasonic testing** **23**

Bibliography **25**
