## Plastics - Determination of specific volume as a function of temperature and pressure, pVT diagram - Piston apparatus method

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....                                      | 1           |
| 3                  | Terms and definitions .....                                     | 1           |
| 4                  | Principle .....   | 3           |
| 5                  | Apparatus .....   | 4           |
| 5.1                | General .....   | 4           |
| 5.2                | Measurement cell .....  | 4           |
| 5.3                | Piston .....  | 5           |
| 5.4                | Temperature-regulating device .....                             | 5           |
| 5.5                | Test temperature measuring device .....                         | 5           |
| 5.6                | Device for measuring the distance travelled by the piston ..... | 5           |
| 5.7                | Pressure-measuring device .....                                 | 6           |
| 5.8                | Measurement system .....  | 6           |
| 5.9                | Balance .....   | 6           |
| 6                  | Equipment calibration .....                                     | 6           |
| 6.1                | System .....  | 6           |
| 6.2                | Measurement cell .....  | 6           |
| 6.3                | Piston displacement measuring device .....                      | 6           |
| 6.4                | Test temperature .....  | 7           |
| 6.4.1              | Location .....  | 7           |
| 6.4.2              | Measurement of test temperature .....                           | 7           |
| 6.4.3              | Temperature calibration .....                                   | 7           |
| 7                  | Test sample .....   | 7           |
| 7.1                | Preparation .....   | 7           |
| 7.2                | Conditioning .....  | 7           |
| 8                  | Procedure .....   | 8           |
| 8.1                | Preliminary phase .....   | 8           |
| 8.2                | Measurements .....  | 8           |
| 8.2.1              | General .....   | 8           |
| 8.2.2              | Isobaric measurements .....                                     | 8           |
| 8.2.3              | Isothermal measurements .....                                   | 9           |
| 8.3                | Final stage .....   | 9           |
| 8.4                | Further measurements of density .....                           | 9           |
| 9                  | Expression of results .....                                     | 10          |
| 10                 | Precision .....   | 10          |
| 11                 | Test report .....   | 10          |
| 11.1               | General and test conditions .....                               | 10          |

|                              |  |           |
|------------------------------|--|-----------|
| <b>11.2</b>                  | <b>Presentation of the results</b> .....   | <b>11</b> |
| <b>Annex A (normative)</b>   | <b>Sources of error when specific volume is measured as a function of temperature and pressure</b> ..... | <b>12</b> |
| <b>Annex B (informative)</b> | <b>Examples of pvT diagrams</b> .....  | <b>14</b> |
