

ISO 17556:2003-08 (E)

Plastics - Determination of the ultimate aerobic biodegradability in soil by measuring the oxygen demand in a respirometer or the amount of carbon dioxide evolved

Contents		Page
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principle	3
5	Test environment	3
6	Materials	3
7	Apparatus	4
8	Procedure	4
9	Calculation and expression of results	7
10	Validity of results	9
11	Test report	9
Annex A (informative) Principle of a manometric respirometer		10
Annex B (informative) Example of a system for measuring the amount of carbon dioxide evolved ...		11
Annex C (informative) Examples of methods for the determination of evolved carbon dioxide		12
Annex D (informative) Theoretical oxygen demand (ThOD)		14
Annex E (informative) Example of a determination of the amount and the molecular mass of water-insoluble polymer remaining at the end of a biodegradation test		15
