ISO 17282:2004-06 (E)

Plastics - Guide to the acquisition and presentation of design data

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Symbols 3
3.1 Test variables 3
3.2 Material properties for stress analysis (see Tables 2 and 3) 3
3.3 Failure properties (see Table 4) 4
3.4 Material properties for processing simulation (see Tables 3, 4 and 5) 5

4 Data needed for design 6
4.1 General 6
4.2 Design for thermomechanical performance 6
4.2.1 The design process 6
4.2.2 Design data for thermomechanical performance 7
4.3 Design for processing analysis 10
4.3.1 Processing simulation 10
4.3.2 Data for simulation of injection moulding 10
4.3.3 Data for simulation of extrusion 12
4.3.4 Data for simulation of blow moulding, blown film extrusion and thermoforming 12

5 Determination of design data 13
5.1 General 13
5.2 Data acquisition for design for mechanical performance 13
5.3 Data acquisition for design for processing 14

Annex A (informative) Illustrations of the application of finite element analyses to plastics components 19

Annex B (informative) Application of processing simulation analysis for plastics 48
