

ISO 15063:2004-08 (E)

Plastics - Polyols for use in the production of polyurethanes - Determination of hydroxyl number by NIR spectroscopy

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Instrumentation	2
6	Near-IR spectral measurements	5
7	Feasibility calibration	6
8	Selection of calibration materials	6
9	Collecting NIR spectra	7
10	Reference method and reference values	8
11	Developing a calibration model	8
12	Validation of a multivariate model	12
13	Precision of NIR estimated values	12
14	Sources of calibration and analysis error	12
15	Calibration transfer	13
16	Calibration quality control	13
17	Procedure	14
18	Test report	14
Annex A (informative) Illustrative results		15
Bibliography		22
