DIN EN 14276-1:2020-11 (E)

Pressure equipment for refrigerating systems and heat pumps - Part 1: Vessels - General requirements

Contents

Page

European foreword 8

Introduction 9

1 Scope 10

2 Normative references 10

3 Terms and definitions 14
3.1 Terms and definitions 14
3.2 Symbols, descriptions and units 17

4 Materials 20
4.1 General 20
4.2 Requirements for materials to be used for pressurized parts 20
4.3 Requirements for materials 20
4.3.1 General 20
4.3.2 Cladding 21
4.3.3 Special considerations 21
4.4 Requirements for prevention of brittle fracture 22
4.4.1 General 22
4.4.2 Material requirements 23
4.5 Material documentation 23
4.6 Materials for non-pressure retaining parts 23

5 Pressure vessel classification 23
5.1 Category of vessel 23
5.2 Fluid classification 24

6 Design 25
6.1 General 25
6.2 Corrosion and corrosion protection 25
6.2.1 General 25
6.2.2 Internal corrosion 25
6.2.3 External corrosion 25
6.2.4 Corrosion allowance information 25
6.3 Stress corrosion cracking 26
6.4 Loading 26
6.5 Maximum allowable pressure PS 26
6.6 Design pressure Pd 26
6.7 Calculation pressure P or Pc 27
6.8 Design temperature td 27
6.9 Minimum material temperature 27
6.10 Calculation temperature tc 27
6.10.1 General 27
6.10.2 Vessel without heater 27
6.10.3 Vessel with heater 28
6.11 Joint coefficient 28
6.12 Design stress 30
6.13 Access and inspection openings, venting and draining provisions, filling and discharge provisions and handling devices 32

6.13.1 Non corrosive fluids 32
6.13.2 Corrosive fluids 32
6.13.3 Venting and draining provisions 32
6.13.4 Filling and discharge provision 32
6.13.5 Handling devices 32
6.14 Methods for design 33
6.14.1 General 33
6.14.2 Design by formulas (DBF) 33
6.14.3 Joint design 38

7 Manufacturing 40
7.1 General 40
7.2 Material traceability 40
7.3 Manufacturing tolerances 40
7.4 Permanent joints 40
7.4.1 General 40
7.4.2 Permanent joint and operator qualification 40
7.4.3 Permanent joint operations and traceability 40
7.4.4 Welding 40
7.4.5 Brazing 41
7.4.6 Permanent joints by deformation 43
7.4.7 Non-permanent joints 43
7.5 Forming of pressure parts 44
7.5.1 General 44
7.5.2 Deep drawing 44
7.6 Post weld heat treatment 45
7.7 Internal cleanness 45
7.8 Repairs/Reworks 45
7.9 Finishing operations 45

8 Testing and inspection 45
8.1 Performance of inspection and testing 45
8.2 Design documentation, review and approval 46
8.2.1 General 46
8.2.2 Design documentation 46
8.2.3 Design examination and design approval 47
8.2.4 Design documentation change 48
8.3 Type examination 48
8.4 Calibration 48
8.5 Material 48
8.6 Manufacturing 49
8.7 Non-destructive and destructive testing of welded joints 49
8.8 Brazed joints 50
8.9 Subcontracted elements 50
8.10 Final inspection 50
8.10.1 General 50
8.10.2 Visual examination 50
8.10.3 Examination of documentation 51
8.10.4 Pressure test 51
8.10.5 Leak test 51
8.11 Marking 52
8.12 Documentation 52
8.12.1 General 52
8.12.2 Manufacturer's instruction 52
8.12.3 Technical documentation for user 53
8.12.4 Records 53

Annex A (normative) Alternative requirements for prevention of brittle fracture: Method according to temperature stress cases 55

A.1 General 55
A.2 Temperature stress cases 57

A.3 Determination of lowest application temperatures for stress cases min t0 75, min t0 50 and min t0 25 57
A.4 Welding conditions 58
A.4.1 Welded connections 58
A.4.2 Heat treatment after welding 59
A.5 Proof of notch impact energy 59

Annex B (normative) Specification and approval of brazing procedures 60

B.1 Introduction 60
B.2 General 60
B.2.1 Responsibility 60
B.2.2 Specification of brazing procedures 60
B.2.3 Technical content of BPS 61
B.3 Test piece 66
B.4 Examination and testing 66
B.4.1 General 66
B.4.2 Visual examination 67
B.4.3 Tensile test 67
B.4.4 Bend test 67
B.4.5 Peel test 68
B.4.6 Metallographic examination 68
B.5 Range of approval 68
B.5.1 General 68
B.5.2 Related to the manufacturer 68
B.5.3 Related to the material 68
B.5.3.1 Parent metal 68
B.5.3.2 Thickness 69
B.5.4 Range of approval 69
B.5.4.1 General 69
B.5.4.2 Angle of branch connection 70
B.5.4.3 Brazing process 70
B.5.4.4 Flow position 70
B.5.4.5 Joint design 70
B.5.4.6 Filler material 70
B.5.4.7 Brazing temperature 71
B.5.4.8 Brazing flux 71
B.5.4.9 Fuel gas, atmosphere, nature of flame or type of energy 71
B.5.4.10 Post braze heat treatment 71
B.6 Brazing Procedure Approval Record (BPAR) 71

Annex C (normative) Pressure testing 72

C.1 Pressure test 72
C.1.1 General 72
C.1.2 Basic requirements 72
C.1.2.1 Pressure vessels 72
C.1.2.2 Accessories 72
C.1.2.3 Safety 72
C.1.2.4 Hydraulic test 72
C.1.2.5 Pneumatic test 73
C.1.3 Pressure test 73
C.1.3.1 Value of test pressure 73
C.1.3.2 Specific value of test pressure for compressor housing 73
C.1.3.3 Temperature requirement 73
C.1.3.4 Test procedure 74
C.1.3.5 Pass fail criteria 74
C.1.3.6 Requirements for pressure gauges 74
C.1.4 Final test report 74
C.2 Acoustic emission examination 75

Annex D (normative) Relations between the different pressures 76

Annex E (normative) Experimental design methods 77

E.1 Introduction 77
E.1.1 General 77
E.1.2 Methods 77
E.1.3 Documentation 78
E.1.4 Duplicate or similar parts 78
E.1.4.1 General 78
E.1.4.2 Duplicate parts 78
E.1.4.3 Geometrically similar part 78
E.1.5 Examination of the components or the vessel 78
E.1.6 Application of pressure 78
E.1.7 Material properties 79
E.2 Strain gauge test method 79
E.2.1 General 79
E.2.2 Procedure 79
E.3 Burst test 80
E.3.1 General 80
E.3.2 Procedure 80
E.3.3 Burst pressure 80
E.4 Housings of hermetic compressors of testing group 2b and vessels of testing group 2b . 80
E.4.1 General 80
E.4.2 Burst test method for housings of vessels 82
E.4.3 Burst test method for housings of compressor 82
E.4.4 Combined burst test / fatigue test method for housings of compressor 83
E.4.4.1 General and burst tests 83
E.4.4.2 Additional fatigue test 84

Annex F (normative) Material characteristics for design 86

Annex G (informative) Component classification in the sense of the Pressure Equipment Directive (PED) 90

Annex H (informative) Selection of category 92

H.1 General 92
H.2 Definition of category for vessels for refrigerating pressure vessel 92

Annex I (normative) Grouping system for materials (extracted from CEN ISO/TR 15608) 93

I.1 Grouping system for steels 93
I.2 Grouping system for aluminium and aluminium alloys 93
I.3 Grouping system for copper and copper alloys 94

Annex J (informative) DN System 95

Annex K (normative) Specification and approval of expansion procedures and operators 97

K.1 General 97
K.1.1 General rules 97
K.1.2 Responsibility 97
K.1.3 Specification of expansion procedures 97
K.1.4 Technical content of EPS 97
K.2 Test piece 99
K.3 Examination and testing 99
K.3.1 General 99
K.3.2 Visual examination 99
K.3.3 Dimensional verification 99
K.3.4 Tests 100
K.4 Range of approval 100
K.4.1 General 100

K.4.2 Related to the manufacturer 100
K.4.3 Related to the material 100
K.4.4 Tube dimensions 100
K.4.5 Expansion factor 100
K.4.6 Expansion process 100
K.4.7 Joint design 100
K.4.8 Tool 100
K.5 Expansion Procedure Approval Record (EPAR) 101
K.6 Expansion operator approval 101
K.6.1 General 101
K.6.2 Validity range of expansion operator qualification 101
K.6.3 Qualification tests 101
K.6.3.1 General 101
K.6.3.2 Test piece 101
K.6.3.3 Assessment of the test piece 101
K.6.4 Examination and testing 101
K.6.5 Period of validity 102
K.6.5.1 Initial approval 102
K.6.5.2 Prolongation 102
K.6.6 Certification 102

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU (Pressure equipment Directive) aimed to be covered 103
