European foreword 3

1 Scope 4

2 Normative references 4

3 Terms, definitions, symbols and uncertainties 4
3.1 Terms and definitions 4
3.2 Symbols and uncertainties 8

4 Requirements for containers and kits 8
4.1 General 8
4.2 Materials and components 8
4.3 Thermal insulation 9
4.3.1 General 9
4.3.2 Seals 9
4.4 Surfaces 10

5 Tests for containers 10
5.1 General 10
5.2 Requested documentation for the test 10
5.3 K-value measurement 11
5.3.1 Testing conditions 11
5.3.2 Test procedure 11
5.3.3 Test procedure for containers (except tanks) 13
5.3.4 Test procedure for tanks 13
5.4 Additional test 13

6 Test reports 13

7 Instruction for use 13

Annex A (informative) Air tightness 14

A.1 General 14
A.2 Air tightness test methodology 14
A.3 Recommended air leakage rates 15

Annex B (informative) Body and insulation kit 16

B.1 Content of the body kit 16
B.2 Kit manufacturer 17
B.3 Kit's approved assembler 18

Annex C (normative) Tanks 19

C.1 Test method 19
C.2 Temperature measurement 19

Annex D (normative) Evaluation of the surface area of insulated vans 23

D.1 General 23
D.2 Method A 23
D.3 Method B 26
