DIN 51503-1:2021-12 (E)

Lubricants - Refrigeration oils - Part 1: Minimum requirements

Contents

Page

Foreword ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions, abbreviations ... 6
3.1 Terms and definitions ... 6
3.2 Abbreviations ... 6

4 Classification ... 6
4.1 General ... 6
4.2 Group KA ... 6
4.2.1 Subgroup KAA ... 6
4.2.2 Subgroup KAB ... 7
4.3 Group KB ... 7
4.4 Group KC ... 7
4.5 Group KD ... 7
4.6 Group KE ... 7

5 Designation ... 7

6 Requirements and testing ... 7

7 Additional information on the properties of refrigeration oils ... 14

Annex A (informative) Explanatory notes ... 15

Annex B (informative) Comparison of important test methods ... 16

Bibliography ... 17

Tables

Table 1 — Subgroup KAA: Refrigeration oils KAA not miscible with ammonia (e.g. mineral oils, alkylbenzenes, polyalphaolefins) ... 8

Table 2 — Subgroup KAB: Refrigeration oils KAB miscible with ammonia (e.g. polyalkylene glycols) ... 9

Table 3 — Group KB: Refrigeration oils miscible with CO_2 (e.g. ester oils, polyalkylene glycols), refrigeration oils not miscible with CO_2 (e.g. polyalphaolefins) ... 10

Table 4 — Group KC: Refrigeration oils KC miscible with HFCKW/HCFO (e.g. mineral oils, alkylbenzenes, ester oils) ... 11

Table 5 — Group KD: Refrigeration oils KD miscible with FKW/HFKW/HFO (e.g. ester oils and polyalkylene glycols) ... 12

Table 6 — Group KE: Refrigeration oils KE miscible with hydrocarbons (e.g. mineral oils, alkylbenzenes, polyalphaolefins, polyalkylene glycols, ester oils) 13

Table 7 — Additional information on refrigeration oils — base fluid (e.g.: mineral oil, alkylbenzene, polyalkylene glycol, polyalphaolefin, ester oil) 14

Table B.1 — Comparison of important test methods 16
