Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8
3.1 Definitions 8
3.2 Symbols, quantities and units 11

4 Materials 13
4.1 General 13
4.2 Requirements for materials to be used for pressurised parts 14
4.3 Requirements for materials 14
4.4 Requirements for prevention of brittle fracture 15
4.5 Material documentation 16
4.6 Materials for non-pressure retaining parts 16

5 Pressure Vessel classification 16
5.1 Category of vessel 16
5.2 Fluid classification 17

6 Design 17
6.1 General 17
6.2 Corrosion and corrosion protection 17
6.3 Stress corrosion cracking 18
6.4 Loading 18
6.5 Maximum allowable pressure PS 18
6.6 Design pressure Pd 18
6.7 Calculation pressure P or Pc 19
6.8 Design temperature td 19
6.9 Minimum material temperature 19
6.10 Calculation temperature tc 19
6.11 Joint coefficient 20
6.12 Design stress 21
6.13 Access and inspection openings, venting and draining provisions, filling and discharge provisions and handling devices 22
6.14 Methods for design 23

7 Manufacturing 28
7.1 General 28
7.2 Material traceability 28
7.3 Manufacturing tolerances 28
7.4 Permanent joints 28
7.5 Forming of pressure parts 33
7.6 Post weld heat treatment 33
7.7 Internal cleanness 33
7.8 Repairs/Reworks 34
7.9 Finishing operations 34

8 Testing and inspection 34
8.1 Performance of inspection and testing 34
8.2 Design documentation, review and approval 34
8.3 Type approval 36
8.4 Calibration 36
8.5 Material 37
8.6 Manufacturing 37
8.7 Non destructive testing 37
8.8 Subcontracted elements 37
8.9 Final inspection 37
8.10 Marking 38
8.11 Documentation 39

Annex A (normative) Alternative requirements for prevention of brittle fracture: Method according to temperature stress cases 41

Annex B (normative) Specification and approval of brazing procedures, brazers and brazing operators 45

Annex C (normative) Pressure testing 59

Annex D (informative) Relations between the different pressures 63

Annex E (normative) Experimental methods 64

Annex F (normative) Material characteristics for design 69

Annex G (informative) Component classification in the sense of the Pressure Equipment Directive (PED) 71

Annex H (informative) Selection of module of conformity 72

Annex I (normative) Grouping system for materials 74

Annex J (informative) DN System 76

Annex K (normative) Specification and approval of expansion procedures and operators 77

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 97/23/EC 83

Bibliography 85
