## Testing of refrigerant compressors

---

<b>Contents</b>	<b>Page</b>
1 Scope and field of application .....	1
2 References .....	1
3 Definitions .....	1
<b>Section one: Determination of refrigerating capacity and of Volumetric efficiency .....</b>	
4 General procedure.....	2
5 Basic test conditions and deviations .....	3
6 Basis of calculations .....	3
7 Test methods .....	4
8 Method A: Secondary fluid calorimeter .....	5
9 Method B: Flooded system refrigerant calorimeter .....	5
10 Method C: Dry system refrigerant calorimeter .....	7
11 Methods D1 and D2: Refrigerant vapour flowmeter .....	8
12 Method F: Refrigerant liquid quantity using a flowmeter.....	9
13 Method G: Water-cooled condenser.....	9
14 Method J: Refrigerant vapour cooling .....	10
15 Method K: Calorimeter in compressor discharge line.....	11
<b>Section two: Determination of the power, isentropic efficiency and coefficient of Performance .....</b>	
16 General procedure.....	19
17 Determination of the power input .....	19
18 Determination of the isentropic efficiency .....	19
19 Determination of the coefficient of performance .....	19
<b>Section three : Reporting of results</b>	
20 Test report.....	20
<b>Annexes</b>	
<b>A Types and calibration of measuring instruments and accuracy of measurement .....</b>	<b>22</b>
<b>B Symbols used in the text for calculations.....</b>	<b>24</b>
<b>C Estimation of errors.....</b>	<b>26</b>
