## Optical radiation physics and illuminating engineering - Part 11: Radiometer for measuring actinic radiant quantities - Terms, characteristics and their classification

---

Contents	Page
Foreword .....	4
1 Scope .....	5
2 Normative references .....	5
3 Terms and definitions.....	5
4 Characteristics and properties .....	8
4.1 General .....	8
4.2 Measurands and action spectra.....	8
4.3 Characteristic of the calibration uncertainty $f_{\text{kal}}$ .....	8
4.4 Lower and upper limits of the measuring range.....	8
4.5 Operating conditions .....	8
4.6 Uncertainties of measurement .....	9
4.7 System response to radiation outside the spectral range of the action spectrum.....	9
4.7.1 General .....	9
4.7.2 Characteristics $f_u$ and $f_o$ for the response to radiation below or above the action range.....	9
4.8 Characteristic of the spectral adaptation $f_1$ .....	10
4.9 Characteristics of the direction-dependent evaluation .....	11
4.9.1 General .....	11
4.9.2 Characteristic for the irradiance $f_2$ .....	11
4.9.3 Characteristic for the spatial irradiance $f_{2,0}$ .....	12
4.9.4 Characteristic for the radiance $f_{2,L}^*(\varepsilon, \varphi)$ .....	12
4.10 Characteristic of non-linearity $f_3$ .....	12
4.10.1 General .....	12
4.10.2 Measurement.....	12
4.10.3 Identification .....	13
4.11 Characteristic of the display device $f_4$ .....	13
4.12 Characteristic of fatigue $f_5$ .....	14
4.13 Characteristic of temperature dependency $f_6$ .....	15
4.14 Characteristic for the influence of the radiation modulation $f_7$ .....	16
4.15 Characteristic for the influence of polarised radiation $f_8$ .....	16
4.16 Characteristic of unequal local sensitivity $f_9$ .....	16
4.17 Characteristic of measuring range changeover $f_{11}$ .....	17
5 Broadband radiometer.....	17
5.1 Structure of a broadband radiometer .....	17
5.2 Requirements for broadband radiometers .....	17
5.3 Calibration.....	18
6 Spectral-measuring radiometer (spectroradiometer) .....	18
6.1 Structure of a spectroradiometer .....	18
6.2 Characteristics of spectroradiometers.....	18
6.2.1 Useful spectral range .....	18
6.2.2 Optical characteristics of the spectral apparatus.....	18
6.2.3 Minimum required measuring time.....	19

6.3	Calculation of the actinic effective radiant quantity $X_{act}$ .....	19
6.4	Calibration .....	19
6.5	Requirements for spectroradiometers .....	19
7	Dosimeter .....	19
7.1	General.....	19
7.2	Instrumental dosimeter .....	20
7.3	Chemical dosimeter .....	20
7.4	Biological dosimeter.....	20
7.5	Calibration .....	21
7.6	Particularities when indicating the characteristics according to Clause 4 for chemical and biological dosimeters .....	21
8	Classification.....	22
Annex A	(informative) Determination of the erroneous radiation response .....	24
Annex B	(normative) Reference spectra .....	25
Annex C	(informative) Performing integral measurements .....	67
Annex D	(informative) Performing spectral measurements .....	68
Bibliography	.....	69
