

DIN 5035-6:1990-12 (E)

Artificial lighting; measurement and evaluation

Contents

	Page		Page
1 Field of application	2	6.8 Measurement of reflectance	5
2 Scope	2	6.9 Determination of cut-off angle	5
3 Quantities	2	7 Evaluation and presentation of results	6
4 Instrumentation	2	7.1 Correction of measured values	6
4.1 Limits of error	2	7.2 Illuminance	6
4.2 Luxmeter	2	7.3 Cylindrical illuminance and reflectances	6
4.3 Instrument for measuring cylindrical illuminance	3	7.4 Luminance distribution in the interior	6
4.4 Luminance meter	3	7.5 Limitation of direct glare	7
4.5 Instrument for measuring reflectance under diffuse incident light	3	7.6 Colour appearance and colour rendering	7
4.6 Voltmeter	3	8 Special provisions for the measurement and evaluation of escape lighting	7
5 Preparation of measurement	3	8.1 Special parameters	7
5.1 General	3	8.2 Measurement procedure for escape lighting	7
5.2 Lighting system	3	8.2.1 General	7
6 Measurement procedure	3	8.2.2 Elimination of stray light	7
6.1 General	3	8.2.3 Measurement of response time	7
6.2 Elimination of stray light	4	8.2.4 Measurement of illuminance	7
6.3 Supply voltage and ambient temperature	4	8.2.5 Limitation of direct glare	7
6.4 Measurement of illuminance	4	8.2.6 Minimum luminance and luminance contrast for illuminated emergency signs	7
6.4.1 General	4	8.2.7 Uniformity of luminance for emergency signs ..	8
6.4.2 Empty rooms	4	8.2.8 Visual impact and legibility of safety signs and colours	8
6.4.3 Furnished rooms	4	9 Special provisions for the measurement and evaluation of safety lighting at high-risk workplaces	10
6.4.4 Illuminance at workplaces	4	9.1 Special parameters	10
6.4.5 Illuminance in circulation areas	4	9.2 Measurement procedure	10
6.4.6 Uniformity of local workplace lighting	4	9.2.1 Response time	10
6.5 Measurement of cylindrical illuminance	5		
6.6 Measurement of luminance	5		
6.7 Determination of luminance of luminaires	5		
		10.2.2 Illuminance	10
		10.2.3 Limitation of direct glare	10
		10.2.4 Visual impact and legibility of safety signs and colours	10
10 Special provisions for measurement and evaluation of operating field lighting	10	10.3 Measurement procedure	10
10.1 Special parameters	10	10.3.1 Measurement of illuminance and its distribution	10
10.2 Instrumentation	10	10.3.2 Measurement of colour appearance	10
10.2.1 Luxmeter for measuring illuminance distribution	10	10.3.3 Measurement of irradiance	10
10.2.2 Luxmeter for measurements using set-up shown in figure 13	10	10.3.4 Measurements to determine cavity ratio, shadow ratio and cavity shadow ratio	10
		11 Test report	11
