## Photometry - Part 7: Classification of illuminance meters and luminance meters

---

| <b>Contents</b>  | <b>Page</b> |
|--|-------------|
| Foreword .....   | 3           |
| 1 Scope .....  | 4           |
| 2 Normative references .....   | 4           |
| 3 Terms and definitions.....   | 4           |
| 4 Photometer classification.....   | 5           |
| 4.1 Calculation of the total characteristic.....                         | 5           |
| 4.1.1 General .....  | 5           |
| 4.1.2 Calculation of the total characteristic of illuminance meters..... | 5           |
| 4.1.3 Calculation of the total characteristic of luminance meters .....  | 5           |
| 4.2 Photometer classification.....                                       | 6           |
| 4.3 Class assignment of a photometer .....                               | 6           |
| 5 Limits for classification .....  | 6           |
| 6 Selecting the class of a photometer .....                              | 9           |
| 6.1 Measurement uncertainty and class .....                              | 9           |
| 6.2 Laboratory measurements.....   | 9           |
| 6.3 Field measurements.....  | 9           |

### Tables

|  |   |
|--|---|
| Table 1 — Class limits for illuminance meters.....                     | 7 |
| Table 2 — Class limits for luminance meters .....                      | 8 |
| Table 3 — Limits for the characteristic “temperature dependence” ..... | 8 |
| Table 4 — Limits for the characteristic “modulated light” .....        | 9 |
