## Laboratory glassware - Borosilicate glass tubing

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | iv          |
| Introduction ..... |  | v           |
| 1                  | Scope .....                              | 1           |
| 2                  | Normative references .....               | 1           |
| 3                  | Terms and definitions .....              | 1           |
| 4                  | Designation .....                        | 1           |
| 5                  | Material .....                           | 1           |
| 5.1                | General .....                            | 1           |
| 5.2                | Hydrolytic resistance .....              | 1           |
| 5.3                | Thermal coefficient of expansion .....   | 1           |
| 6                  | Range of sizes and tolerances .....      | 2           |
| 6.1                | Diameter and wall thickness .....        | 2           |
| 6.1.1              | Determination of outer diameter .....    | 2           |
| 6.1.2              | Determination of wall thickness .....    | 2           |
| 6.2                | Wall thickness difference (Siding) ..... | 2           |
| 6.3                | Length .....                             | 2           |
| 6.4                | Straightness .....                       | 2           |
| 6.5                | Ovality .....                            | 4           |
| Bibliography ..... |  | 8           |
