Automated liquid handling systems - Part 2: Measurement procedures for the determination of volumetric performance

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	1
5	Measurement methods	2
5.1	Overview of methods suitable for measuring ALHS performance	2
5.2	Photometric methods	9
5.2.1	Dual-dye ratiometric photometric method	9
5.2.2	Single-dye photometric method	9
5.2.3	Fluorescence method	9
5.3	Gravimetric methods	9
5.3.1	Single channel method	9
5.3.2	Regression analysis	10
5.4	Hybrid photometric/gravimetric method	10
5.5	Dimensional methods	10
5.5.1	Optical image analysis of droplets	10
5.5.2	Optical image analysis of capillaries	11
6	Equipment and preparation	11
6.1	Test equipment	11
6.2	Manually operated single- and multi-channel pipettes	12
6.3	Preparation for testing	12
7	Thermal expansion	13
8	Traceability and measuring system uncertainty	13
8.1	Traceability	13
8.2	Estimation of measuring system uncertainty	13
8.2.1	Whole system approach	13
8.2.2	Measurement model approach	13
9	Reporting	14
Annex A (normative) Calculation of liquid volumes from balance readings		15
Annex B (normative) Dual-dye ratiometric photometric procedure		18
Annex C (normative) Single dye photometric procedure		24
Annex D (normative) Gravimetric procedure, single channel measurement		29
Annex E (normative) Gravimetric regression procedure		33

Annex F (normative) Photometric/gravimetric hybrid procedure	39
Annex G (normative) Optical image analysis of droplets	48
Annex H (normative) Fluorescence procedure	57
Annex I (normative) Optical image analysis of capillaries	70
Bibliography	76
