ISO 8655-10:2024-02 (E)

Piston-operated volumetric apparatus - Part 10: User guidance, and requirements for competence, training, and POVA suitability

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Requirements and best practices 1
4.1 Selection of POVA 1
4.2 Selection of exchangeable parts 2
4.3 Best practices 2
4.3.1 General 2
4.3.2 Setting of the volume (variable volume POVA) 2
4.3.3 Air-displacement pipettes 3
4.3.4 Using air-displacement pipettes for liquids with properties differing from water 5
4.3.5 Positive displacement pipettes 6
4.3.6 Burettes 7
4.3.7 Dilutors 8
4.3.8 Dispensers 8
4.3.9 Syringes 9

5 Userqualificationandre-qualification 10
5.1 General 10
5.2 User training 10
5.3 User competence 10
5.4 User qualification 11
5.5 Documentation of user qualification 11

6 POVAqualificationandre-qualification 11
6.1 General 11
6.2 Metrological performance requirements 12
6.2.1 POVA maximum permissible errors 12
6.2.2 Liquid handling process tolerances 12
6.2.3 Establishing performance requirements 12
6.3 Frequency 12
6.4 Replicate measurements 13
6.4.1 General 13
6.4.2 Impact of the number of replicate measurements on uncertainty 13
6.5 Pass/fail decision rules 13
6.5.1 General 13
6.5.2 No comparison to tolerances 14
6.5.3 Pass/fail determination of calibration 14
6.5.4 Pass/fail status of routine tests 14
6.5.5 Pass/fail assessment 14
6.6 Safe liquid handling range 14
6.7 Maintenance 15

7 Uncertainty in use of a single delivered volume 16

Annex A (informative) Selection of pipettes and exchangeable parts 17
