DIN EN 15605:2010-12 (E)

Copper and copper alloys - Inductively coupled plasma optical emission spectrometry

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 6

3 Principle 6

4 Reagents 6

5 Apparatus 11

6 Sampling 11

7 Procedure 11
7.1 Method A: Coppers 11
7.2 Method B: Copper-zinc alloys 15
7.3 Method C: Copper-tin alloys 19
7.4 Method D: Copper-aluminium alloys 23
7.5 Method E: Copper-beryllium alloys 27
7.6 Method F: Copper-nickel alloys 31

8 Expression of results 35

9 Precision 35
9.1 Method A -- Coppers 35
9.2 Method B -- Copper-zinc alloys 36
9.3 Method C -- Copper-tin alloys 37
9.4 Method D -- Copper-aluminium alloys 38
9.5 Method E -- Copper-beryllium alloys 39
9.6 Method F -- Copper-nickel alloys 40

10 Test report 40

Annex A (informative) Optical emission spectrometer (OES) -- Suggested performance criteria to be checked 41

Annex B (informative) Inductively coupled plasma emission spectrometry method for the analysis of Copper-tin-lead alloys 43
