

ISO 28401:2010-12 (E)

Light metals and their alloys - Titanium and titanium alloys - Classification and terminology

Contents		Page
Foreword		iv
1	Scope	1
2	Material	1
3	Specific terms and definitions	2
4	Unwrought products	2
5	Wrought products	2
6	Castings	5
7	Methods of processing and treatment	6
8	Surface condition	8
9	Applications	8
10	Abbreviations for titanium melting methods	9
11	Classification of titanium and titanium alloys	9
11.1	General	9
11.2	Unalloyed titanium	9
11.3	Titanium alloys	9
12	Titanium grades and compounds	10
12.1	Commercially pure titanium (CP titanium)	10
12.2	Corrosion-resistance-enhanced grades of CP titanium	10
12.3	Titanium-base intermetallic compounds	10
Annex A (normative) Dividing line between titanium and titanium alloys		11
Annex B (normative) Explanatory notes concerning the definitions of wrought products		12
Alphabetical index		13
