

DIN EN 16090:2012-02 (E)

Copper and copper alloys - Estimation of average grain size by ultrasound

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	General requirements	5
4.1	Personnel qualification	5
4.2	Condition of products to be tested	6
4.3	Test equipment	6
4.4	Procedure	7
5	Instrument adjustment	8
6	Reference samples and calibration	8
7	Acceptance criteria	8
Bibliography		9
Figures Figure 1 -- Simplified representation of ultrasonic technique for grain size estimation		7
Figure 2 -- Simplified illustration of backscattered signals		7
