

# DIN EN 13601:2013-09 (E)

## Copper and copper alloys - Copper rod, bar and wire for general electrical purposes

---

| <b>Contents</b>       |  | <b>Page</b> |
|-----------------------|--|-------------|
| Foreword .....        |  | 4           |
| 1                     | Scope .....  | 6           |
| 2                     | Normative references .....                                   | 6           |
| 3                     | Terms and definitions .....                                  | 7           |
| 4                     | Designations .....   | 7           |
| 4.1                   | Material .....   | 7           |
| 4.2                   | Material condition .....                                     | 8           |
| 4.3                   | Product .....  | 8           |
| 5                     | Ordering information .....                                   | 9           |
| 6                     | Requirements .....   | 11          |
| 6.1                   | Composition .....  | 11          |
| 6.2                   | Mechanical properties .....                                  | 11          |
| 6.3                   | Bending characteristics .....                                | 11          |
| 6.4                   | Electrical properties .....                                  | 11          |
| 6.5                   | Freedom from hydrogen embrittlement .....                    | 11          |
| 6.6                   | Dimensions and tolerances .....                              | 11          |
| 6.7                   | Form tolerances .....  | 13          |
| 6.8                   | Wire in coils .....  | 15          |
| 6.9                   | Mass tolerances .....  | 15          |
| 6.10                  | Surface condition .....                                      | 15          |
| 7                     | Sampling .....   | 15          |
| 7.1                   | General .....  | 15          |
| 7.2                   | Analysis .....   | 15          |
| 7.3                   | Mechanical and electrical tests .....                        | 16          |
| 8                     | Test methods .....   | 16          |
| 8.1                   | Analysis .....   | 16          |
| 8.2                   | Tensile test .....   | 16          |
| 8.3                   | Hardness test .....  | 16          |
| 8.4                   | Bend test .....  | 16          |
| 8.5                   | Electrical resistivity test .....                            | 16          |
| 8.6                   | Hydrogen embrittlement test .....                            | 17          |
| 8.7                   | Retests .....  | 17          |
| 8.8                   | Rounding of results .....                                    | 17          |
| 9                     | Declaration of conformity and inspection documentation ..... | 17          |
| 9.1                   | Declaration of conformity .....                              | 17          |
| 9.2                   | Inspection documentation .....                               | 17          |
| 10                    | Marking, packaging, labelling .....                          | 18          |
| Annex A (informative) | Characteristics of coppers for electrical purposes .....     | 27          |
| Bibliography .....    |  | 29          |

|   |       |           |
|---|-------|-----------|
| <b>Figures</b>  |       |           |
| <b>Figure 1 -- Sharp corner</b>   | ..... | <b>12</b> |
| <b>Figure 2 -- Rounded corner</b>   | ..... | <b>12</b> |
| <b>Figure 3 -- Semi-circular edge</b>   | ..... | <b>12</b> |
| <b>Figure 4 -- Measurement of twist</b>   | ..... | <b>14</b> |
| <b>Figure 5 -- Measurement of straightness</b>  | ..... | <b>14</b> |
| <b>Figure 6 -- Measurement of flatness</b>  | ..... | <b>15</b> |
| <b>Tables</b>   |       |           |
| <b>Table 1 -- Composition of Cu-OFE and Cu-PHCE</b>   | ..... | <b>19</b> |
| <b>Table 2 -- Composition of copper grades, other than those made from Cu-OFE (CW009A) and Cu-PHCE (CW022A)</b> | ..... | <b>20</b> |
| <b>Table 3 -- Mechanical properties</b>   | ..... | <b>21</b> |
| <b>Table 4 -- Electrical properties (at 20 °C)</b>  | ..... | <b>22</b> |
| <b>Table 5 -- Dimensional tolerances for round, square and hexagonal rod and wire</b>                           | ..... | <b>23</b> |
| <b>Table 6 -- Tolerances on width and thickness of bar and rectangular wire</b>                                 | ..... | <b>23</b> |
| <b>Table 7 -- Maximum radii for sharp corners of rod, bar and wire</b>  | ..... | <b>24</b> |
| <b>Table 8 -- Radii for rounded corners of rod, bar and wire</b>  | ..... | <b>24</b> |
| <b>Table 9 -- Tolerances on fixed lengths (FL)</b>  | ..... | <b>25</b> |
| <b>Table 10 -- Maximum twist of square or hexagonal rod or rectangular bar</b>                                  | ..... | <b>25</b> |
| <b>Table 11 -- Straightness of rod and bar</b>  | ..... | <b>25</b> |
| <b>Table 12 -- Flatness of bar</b>  | ..... | <b>26</b> |
| <b>Table 13 -- Sampling rate</b>  | ..... | <b>26</b> |
| <b>Table A.1 -- Particular characteristics of coppers for electrical purposes</b>                               | ..... | <b>28</b> |
