

# DIN EN 13601:2021-07 (E)

## Copper and copper alloys - Copper rod, bar and wire for general electrical purposes

---

| <b>Contents</b>         |   | <b>Page</b> |
|-------------------------|---|-------------|
| European foreword ..... |   | 4           |
| Introduction .....      |   | 5           |
| 1                       | Scope .....                               | 6           |
| 2                       | Normative references .....                | 6           |
| 3                       | Terms and definitions .....               | 7           |
| 4                       | Designations .....                        | 7           |
| 4.1                     | Material .....                            | 7           |
| 4.1.1                   | General .....                             | 7           |
| 4.1.2                   | Symbol .....                              | 7           |
| 4.1.3                   | Number .....                              | 7           |
| 4.2                     | Material condition .....                  | 8           |
| 4.3                     | Product .....                             | 8           |
| 5                       | Ordering information .....                | 9           |
| 6                       | Requirements .....                        | 11          |
| 6.1                     | Composition .....                         | 11          |
| 6.2                     | Mechanical properties .....               | 11          |
| 6.3                     | Bending characteristics .....             | 11          |
| 6.4                     | Electrical properties .....               | 11          |
| 6.5                     | Freedom from hydrogen embrittlement ..... | 11          |
| 6.6                     | Dimensions and tolerances .....           | 11          |
| 6.6.1                   | Diameter or width across-flats .....      | 11          |
| 6.6.2                   | Corner configuration .....                | 11          |
| 6.6.3                   | Length .....                              | 13          |
| 6.7                     | Form tolerances .....                     | 13          |
| 6.7.1                   | General .....                             | 13          |
| 6.7.2                   | Twist .....                               | 13          |
| 6.7.3                   | Straightness .....                        | 14          |
| 6.7.4                   | Flatness of bar .....                     | 15          |
| 6.8                     | Wire in coils .....                       | 15          |
| 6.9                     | Mass tolerances .....                     | 15          |
| 6.10                    | Surface condition .....                   | 15          |
| 7                       | Sampling .....                            | 15          |
| 7.1                     | General .....                             | 15          |
| 7.2                     | Analysis .....                            | 15          |
| 7.3                     | Mechanical and electrical tests .....     | 16          |
| 8                       | Test methods .....                        | 16          |
| 8.1                     | Analysis .....                            | 16          |
| 8.2                     | Tensile test .....                        | 16          |
| 8.3                     | Hardness test .....                       | 16          |
| 8.4                     | Bend test .....                           | 16          |
| 8.5                     | Electrical resistivity test .....         | 17          |
| 8.6                     | Hydrogen embrittlement test .....         | 17          |
| 8.7                     | Retests .....                             | 17          |

|     |  |    |
