DIN 17745:2025-09 (E)

Wrought alloys of nickel and iron - Chemical composition

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Designation 4

5 Chemical composition 4

6 Semi-finished products 4

7 Analysis of chemical composition 5

8 Properties 5
8.1 Coefficients of thermal expansion for thermal expansion materials 5
8.2 Magnetic properties of soft magnetic materials 5

9 Rounding of results 5

Bibliography 12

Figures Figure 1 -- Typical mean coefficient of linear thermal expansion () of thermal expansion materials as in Table 2 in the annealed condition for various temperature intervals 11

Tables Table 1 -- Chemical composition of soft magnetic materials 6

Table 2 -- Chemical composition of thermal expansion materials 7

Table 3 -- Information on the use of soft magnetic materials as in Table 1 8

Table 4 -- Information on the use of thermal expansion materials as in Table 2 9

Table 5 -- Tolerances for the mean coefficient of linear thermal expansion of thermal expansion materials as in Table 2 for selected temperature intervals 10
