Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 7

4 Requirements 9
4.1 Ordering Information 9
4.2 Selection of alloy and temper 9
4.3 Product requirements 9

5 Evaluation of conformity 12
5.1 General 12
5.2 Testing 12
5.3 Factory production control (FPC) 14
5.4 One-off products, prototypes and products produced in very small quantities 16

6 Marking, labelling and packaging 17

Annex A (normative) Fatigue testing and design of extruded, rolled or forged products 18

A.1 General 18
A.2 Fatigue testing of the constituent material (extruded, rolled or forged products) 18
A.3 Test piece for fatigue testing 19
A.4 Design code 19

Annex B (normative) Bendability 20

B.1 General 20
B.2 Bendability classes 21
B.3 Assignment to standardized tempers of semi-finished products 22

Annex ZA (informative) Clauses of this European Standard addressing the provisions of EU Construction Products Directive CPD - EU Directive 89/106/EEC 24

ZA.1 Scope and relevant characteristics 24

ZA.2 Procedures for the attestation of conformity of structural metallic construction products 25

ZA.3 CE marking and labelling 27
