

DIN EN 13979-1:2010-02 (E)

Railway applications - Wheelsets and bogies - Monobloc wheels - Technical approval procedure - Part 1: Forged and rolled wheels (includes Amendment A1:2009)

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Parameters for the definition of the application covered	6
3.1	Parameters for geometrical interchangeability	6
3.1.1	Functional requirements	6
3.1.2	Assembly requirements	7
3.1.3	Maintenance requirements	7
3.2	Parameters for thermomechanical assessment	7
3.3	Parameters for mechanical assessment	7
3.4	Parameters for acoustic assessment	8
4	Description of the wheel to be approved	8
5	Assessment of the geometrical interchangeability	8
6	Assessment of the thermomechanical behaviour	8
6.1	General procedure	8
6.2	First stage - Braking bench test	9
6.2.1	Test procedure	9
6.2.2	Decision criteria	9
6.3	Second stage - Wheel fracture bench test	10
6.3.1	General	10
6.3.2	Test procedure	10
6.3.3	Decision criterion	10
6.4	Third stage - Field braking test	10
6.4.1	General	10
6.4.2	Test procedure	10
6.4.3	Decision criteria	10
7	Assessment of the mechanical behaviour	11
7.1	General procedure	11
7.2	First stage - Calculation	11
7.2.1	Applied forces	11
7.2.2	Calculation procedure	12
7.2.3	Decision criteria	13
7.3	Second stage - Bench test	13
7.3.1	General	13
7.3.2	Definition of bench loading and of the test procedure	13
7.3.3	Decision criteria	13
8	Assessment of the acoustical behaviour	13
8.1	General procedure	13
8.2	Calculation procedure	14
8.3	Field measurements	14
8.4	Decision criteria	14

9	Technical approval documents	15
Annex A (normative) Assessment of the thermomechanical behaviour		17
A.1	Assessment organigram	17
A.2	Braking bench test procedure	18
A.2.1	Principle of the test	18
A.2.2	Definition of braking	18
A.2.3	Method of measuring the decision criteria	18
A.2.4	Tests and measurements	20
A.2.5	Anomalies	21
A.3	Wheel fracture bench test procedure	21
A.3.1	Principle of the test	21
A.3.2	Definition of drag braking	21
A.3.3	Pre-cracking of the rim	22
A.3.4	Special measurement methods required for this test	22
A.3.5	Tests and measurements	22
A.3.6	Anomalies	23
A.4	Field braking test procedure	23
A.4.1	Principle of the test	23
A.4.2	Definition of braking	23
A.4.3	Method of measurement of the decision criteria	24
A.4.4	Standard test run	24
A.4.5	Tests and measurements	25
A.4.6	Anomalies	26
Annex B (normative) Organigram of the mechanical behaviour assessment		27
Annex C (informative) Mechanical behaviour - Finite element code assessment		28
Annex D (informative) Mechanical behaviour - Bench loading and test procedure		29
D.1	Principle of bench loading and test procedure	29
D.2	Definition of loading	29
D.2.1	General	29
D.2.2	Measurement of the stresses during field tests	30
D.3	Fatigue bench test	30
D.3.1	Method 1 - Random fatigue test	30
D.3.2	Method 2 - Single-stage fatigue test	31
Annex E (informative) Assessment of the acoustical behaviour		34
E.1	Assessment organigram	34
E.2	Calculation procedure	35
E.2.1	Preliminary comment	35
E.2.2	Calculation of the wheel modal basis	35
E.2.3	Selection of the reference track model	35
E.2.4	Definition of the calculation parameters	35
E.2.5	Power calculation	35
E.2.6	Insertion	36
E.2.7	Calculations of the decision criteria for acoustical technical approval of the wheel	37
E.2.8	Optional calculations	37
E.3	Field measurement procedure	37
E.3.1	Objective and preliminary remark	37
E.3.2	Recommendations for the operating conditions	38
E.3.3	Measurement procedure	41
E.3.4	Analysis of results	43
Annex F (informative) !!!!Drag braking values for interoperability"....."		46
Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC of the European Parliament and of the Council of 17 June 2008 on the interoperability of the rail system within the Community"....."		47
