DIN EN 15612:2011-01 (E)

Railway applications - Braking - Brake pipe accelerator valve (includes Amendment A1:2010)

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Design and manufacture 6
4.1 General 6
4.2 Functional requirements 6
4.2.1 General 6
4.2.2 Operating requirements 7
4.2.3 Train/vehicle behaviour 7
4.2.4 Affect of overcharge 7
4.2.5 Affect of individual vehicle 7
4.2.6 Subsequent emergency application 7
4.2.7 Sensitivity 7
4.2.8 Insensitivity to brake pipe pressure fall 7
4.2.9 Insensitivity to distributor valve quick service device operation 8
4.2.10 Isolation 8
4.2.11 Leakage 8
4.3 Vibration and shocks requirements 8
4.4 Environment requirements 8
4.4.1 General 8
4.4.2 Temperature 9
4.4.3 Other environmental conditions 9
4.5 Compressed air quality 11
4.6 Service life 11
4.7 Fire behaviour 11
4.8 External appearance 11
4.9 Design requirements regarding pressure stress 11
4.10 Interfaces 12
4.10.1 General 12
4.10.2 Mechanical 12
4.10.3 Pneumatic 12

5 Materials 12

6 Type tests 12
6.1 General 12
6.2 Individual brake pipe accelerator tests 12
6.2.1 Test bench for individual brake pipe accelerator tests 12
6.2.2 Sampling for type tests 13
6.2.3 Test temperature and air quality 14
6.2.4 Procedure for type tests 14
6.2.5 Operation at extreme temperatures 17
6.3 Simulated train consist tests 18
6.3.1 Simulated train consist test bench 18
6.3.2 Sampling for train consist test 19
6.3.3 Test temperature and air quality 19

7 Routine test and inspection 20

8 Documentation 20

9 Designation 21

10 Identification and marking 21

Annex ZA (informative) **A1 Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC of the European Parliament and of the Council of 17 June 2008 on the interoperability of the rail system within the Community (Recast) A1 ..... 22**
