DIN EN 15827:2011-06 (E)

Railway applications - Requirements for bodies and running gears

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Technical specification and interface management 11
4.1 General bogie requirements 11
4.2 Specification of structural information 12
4.3 Specification of dynamics information 13
4.4 Component specifications 14
4.5 Maintenance specification 15

5 Engineering process 15

6 Structural design criteria 15
6.1 Load definition 15
6.1.1 Principles for establishing design loads 15
6.1.2 Exceptional loads 16
6.1.3 Ultimate loads 17
6.1.4 Fatigue loads 18
6.2 Structural acceptance criteria 19
6.2.1 Principle 19
6.2.2 Utilisation 19
6.2.3 Safety factor 20
6.3 Material strength 21
6.3.1 Requirement 21
6.3.2 Static strength 21
6.3.3 Ultimate strength and stability 22
6.3.4 Fatigue strength 23
6.3.5 Stiffness criteria 24
6.4 Component structural design requirements 25
6.4.1 General 25
6.4.2 Bogie frame 25
6.4.3 Body/bogie connection 25
6.4.4 Axleboxes 25
6.4.5 Axles 26
6.4.6 Wheels 26
6.4.7 Suspension components 26
6.4.8 Attachments and connections 26
6.5 Corrosion protection 27

7 Dynamic performance criteria 27
7.1 Introduction 27
7.2 Dynamic acceptance criteria 28
7.2.1 General 28
7.2.2 Safety against derailment at low speed 28
7.2.3 Running safety and track loading 29

7.2.4 Vibration dose and noise levels ... 29
7.2.5 Gauging ... 29
7.3 Ride characteristics and ride comfort ... 30
7.4 Component dynamic performance requirements ... 30

8 Acceptance criteria ... 30

9 Validation of the design ... 30
9.1 Validation plan ... 30
9.2 Structural integrity validation ... 32
9.3 Dynamic performance validation ... 32
9.4 Use of existing validation records ... 33

10 Quality requirements ... 33

11 Maintenance plan ... 34
11.1 Maintenance plan objective and scope ... 34
11.2 Content of a maintenance plan ... 35
11.3 Competences ... 36
11.3.1 Qualification of equipment and systems ... 36
11.3.2 Staff certification and competence ... 36
11.3.3 Maintenance organization ... 36
11.3.4 Qualification of an undertaking for maintenance ... 37
11.4 Records and traceability ... 38
11.5 Unplanned maintenance ... 39
11.6 Revision of plan ... 39
11.7 Implementation of the maintenance schedule ... 40
11.8 Validation of the maintenance plan ... 40
11.9 Maintenance quality requirements ... 40
11.10 Incident/accident damage repair ... 41
11.11 Material disposal ... 41

12 Proven operating envelope ... 41
12.1 General requirement ... 41
12.2 Standardised bogies/running gear for freight wagons ... 42

Annex A (informative) Technical Specification ... 43

Annex B (informative) Engineering process requirements ... 46

Annex C (informative) Design loads ... 47

Annex D (normative) Component related standards ... 48

Annex E (informative) Design development and simulation ... 49

Annex F (informative) Acceptance process flow diagram ... 51

Annex G (informative) Dynamic performance validation by numerical simulation ... 52

Annex H (normative) Minimum requirements for maintenance inspections ... 66

Annex I (informative) Proven operating envelope ... 69

Annex J (normative) Standardised bogies/running gear for freight wagons ... 73

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC ... 75

Bibliography ... 78
