

DIN EN 13146-3:2012-06 (E)

Railway applications - Track - Test methods for fastening systems - Part 3: Determination of attenuation of impact loads

| Contents | | Page |
|-----------------------|--|-------------|
| Foreword | | 3 |
| 1 | Scope | 4 |
| 2 | Normative references | 4 |
| 3 | Terms and definitions, symbols and abbreviations | 4 |
| 3.1 | Terms and definitions | 4 |
| 3.2 | Symbols and abbreviations | 4 |
| 4 | Principle | 5 |
| 5 | Apparatus | 5 |
| 5.1 | Concrete sleeper or bearer | 5 |
| 5.2 | Support | 5 |
| 5.2.1 | Reference method | 5 |
| 5.2.2 | Alternative method | 6 |
| 5.3 | Rail | 6 |
| 5.4 | Strain measuring and recording equipment | 6 |
| 5.5 | Drop mass | 6 |
| 5.6 | Preloading equipment | 7 |
| 6 | Test specimens | 7 |
| 6.1 | Concrete sleeper or bearer | 7 |
| 6.2 | Fastening | 7 |
| 7 | Procedure - Reference method | 8 |
| 7.1 | Preparation | 8 |
| 7.2 | Testing | 8 |
| 7.3 | Check on sleeper condition | 8 |
| 7.4 | Calculation | 8 |
| 8 | Procedure - Alternative method | 9 |
| 8.1 | Preparation | 9 |
| 8.2 | Testing and checking | 9 |
| 8.3 | Calculation | 9 |
| 9 | Test report | 9 |
| Annex A (informative) | Sample calculation | 11 |
