

DIN EN 16286-1:2013-06 (E)

Railway applications - Gangway systems between vehicles - Part 1: Main applications

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	Abbreviated terms	13
5	General	13
5.1	Description of the system	13
5.2	Environmental resistance	14
6	Vehicle body coordinate system	14
7	Technical requirements	14
7.1	General	14
7.2	Weight	15
7.3	Geometry	15
7.3.1	Outer gangway dimensions	15
7.3.2	Clearway	15
7.3.3	Clearway for wheelchairs	16
7.3.4	Length	16
7.3.5	Steps and ramps	16
7.4	Relative movements	17
7.5	Load requirements	18
7.5.1	General	18
7.5.2	Vertical load applied to bridge system	18
7.5.3	Dynamic loads on gangway system and fixation	18
7.5.4	Horizontal load	18
7.5.5	Aerodynamic loads	18
7.5.6	Pressure tightness	19
7.6	Water tightness	19
7.7	Crash behaviour	19
7.8	Earthing	19
7.9	Other requirements	19
7.10	Fire resistance	20
7.11	Acoustic requirements	20
7.12	Thermal insulation	20
7.13	Lifetime	20
8	Interfaces with the vehicle	20
8.1	General	20
8.2	Mechanical interfaces	20
8.3	Adjoining components	22
8.3.1	General	22
8.3.2	Vehicle connections	22
8.3.3	Gangway doors	23
8.3.4	Tail and head lights	23

9	Testing	23
9.1	Weight measurement	23
9.2	Movement test	23
9.3	Wheelchair and service trolley test	24
9.4	Pressure tightness test	24
9.5	Water tightness test	24
9.6	Acoustic measurements	25
10	Maintenance	25
10.1	General	25
10.2	Installation	26
10.3	Operational handling	26
10.4	Cleaning of a gangway	26
10.5	Removal of graffiti	26
10.6	Vandalism	26
	Annex A (normative) Flange intercommunication connections	27
A.1	General	27
A.2	Construction requirements	27
	Annex B (informative) Interconnecting gangways for coaches travelling at speeds of up to 200 km/h on high-speed lines with tunnel sections	31
	Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC	32
	Bibliography	34
