

# DIN EN 16452:2015-11 (E)

## Railway applications - Braking - Brake blocks

---

<b>Contents</b>		<b>Page</b>
Foreword .....		7
Introduction .....		8
<b>1</b>	<b>Scope .....</b>	<b>9</b>
<b>2</b>	<b>Normative references .....</b>	<b>9</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>10</b>
<b>4</b>	<b>Abbreviations .....</b>	<b>11</b>
<b>5</b>	<b>Overall requirements .....</b>	<b>12</b>
5.1	Deviations from requirements .....	12
5.2	Functions .....	12
5.3	Operational criteria .....	13
5.3.1	Friction material performance .....	13
5.3.2	Service performance .....	13
5.3.3	Brake block characteristics .....	14
<b>6</b>	<b>Acceptance procedure .....</b>	<b>14</b>
6.1	Brake block performance requirements .....	14
6.1.1	General .....	14
6.1.2	Category A .....	14
6.1.3	Category B .....	15
6.1.4	Category C .....	15
6.2	Approval test requirements .....	15
6.3	Dynamometer specification .....	18
<b>7</b>	<b>Category A requirements .....</b>	<b>18</b>
7.1	Brake block characteristics .....	18
7.1.1	Standard design .....	18
7.1.2	Brake block characterization test .....	18
7.1.3	Brake block mechanical characteristics for service operation .....	18
7.2	Dynamic friction performance .....	19
7.2.1	Generic requirements for assessment process .....	19
7.2.2	Bedded and non bedded performance .....	19
7.2.3	Variation in mean coefficient of friction in dry condition for a brake to rest .....	19
7.2.4	Mean friction coefficient variation under wet conditions .....	19
7.2.5	Mean friction coefficient variation at high initial temperature .....	20
7.2.6	Mean friction coefficient variation after simulation of a downhill brake application .....	20
7.2.7	Instantaneous friction coefficient variation during simulation of a downhill brake application .....	20
7.2.8	Variation in instantaneous friction for a brake to rest .....	22
7.3	Static friction coefficient .....	22
7.4	Extreme winter conditions (freight wagons) .....	22
7.4.1	General .....	22
7.4.2	Dynamometer test .....	23
7.4.3	Train brake test .....	23
7.5	Locked brake (fusibility) .....	23
7.5.1	Generic prescriptions .....	23
7.5.2	Specific prescriptions for freight wagons .....	24

8	Category B requirements .....	24
8.1	Vehicle brake test .....	24
8.2	Dynamometer wear test (friction couple) .....	25
8.3	Dynamic friction performance .....	25
8.4	In service assessment .....	25
9	Category C requirements .....	25
9.1	Metal pick up .....	25
9.2	Influence on track circuit operation (shuntage) .....	26
10	Environmental issues .....	26
10.1	General .....	26
10.2	Noise .....	26
10.3	Odour .....	26
10.4	Smoke, fumes and sparking .....	26
10.5	Recycling and disposal .....	26
11	Marking .....	27
Annex A (normative) Summary of Dynamometer test programs and acceptance criteria .....		28
Annex B (normative) General requirements for conducting dynamometer test programmes .....		30
B.1	General .....	30
B.2	Rotation and ventilation conditions .....	30
B.3	Brake application timing ts .....	30
B.4	Bedding .....	30
B.5	Wear .....	30
B.6	Roughness index of the wheel tread .....	31
B.7	Interruption of the tests .....	31
B.8	Temperatures .....	31
B.9	Wet conditions .....	31
B.10	Test of simulation of downhill .....	32
B.11	Test wheels .....	32
Annex C (normative) Composite brake blocks (K) (2Bg - 2Bgu)- Demonstration of friction properties for S and SS (S/SS) - braked freight wagons (vmax = 120 km/h) .....		33
C.1	Program for performance tests .....	33
C.2	Program for simulation brake assessment .....	38
C.3	Dispersion range of mean friction coefficients .....	39
C.4	Dispersion range of instantaneous friction coefficients .....	42
Annex D (normative) Composite brake blocks (LL) - Demonstration of friction properties for S and SS (S/SS) - braked freight wagons (vmax = 120 km/h) .....		44
D.1	Program for performance tests .....	44
D.2	Program for simulation brake assessment .....	48
D.3	Dispersion range of mean friction coefficients .....	50
D.4	Dispersion range of instantaneous friction coefficients .....	52
Annex E (normative) Composite brake blocks (K) (1Bg)- Demonstration of friction properties for S and SS (S/SS) - braked freight wagons (vmax = 120 km/h) .....		53
E.1	Program for performance tests .....	53
E.2	Dispersion range of mean friction coefficients .....	56
E.3	Dispersion range of instantaneous friction coefficients .....	58
Annex F (normative) Composite brake blocks (L) - Demonstration of friction properties for extra tread brake of coach .....		59

F.1	Program for performance tests .....	59
F.2	Program for simulation brake assessment .....	62
F.3	Dispersion range of mean friction coefficients in dry condition .....	63
F.4	Dispersion range of mean friction coefficients in wet condition .....	64
F.5	Dispersion range of instantaneous friction coefficients .....	65
<b>Annex G (normative) Composite brake blocks (K) - Demonstration of friction properties for locomotives .....</b>		<b>67</b>
G.1	Program for performance tests .....	67
G.2	Program for simulation brake assessment .....	70
G.3	Dispersion range of mean friction coefficients in dry condition .....	71
G.4	Dispersion range of mean friction coefficients in wet condition .....	72
G.5	Dispersion range of instantaneous friction coefficients .....	73
<b>Annex H (normative) Composite brake blocks (K) - Demonstration of friction properties for EMU - DMU .....</b>		<b>75</b>
H.1	Program for performance tests .....	75
H.2	Program for simulation brake assessment .....	80
H.3	Dispersion range of mean friction coefficients in dry condition .....	81
H.4	Dispersion range of mean friction coefficients in wet condition .....	82
H.5	Dispersion range of instantaneous friction coefficients .....	83
<b>Annex I (normative) Composite brake blocks (K) - Demonstration of friction properties for High speed train (motor bogie) .....</b>		<b>85</b>
I.1	Program for performance tests .....	85
I.2	Program for simulation brake assessment .....	88
I.3	Dispersion range of mean friction coefficients in dry condition .....	89
I.4	Dispersion range of mean friction coefficients in wet condition .....	91
I.5	Dispersion range of instantaneous friction coefficients .....	92
<b>Annex J (informative) Dynamometer test program - Generic test program .....</b>		<b>94</b>
J.1	General .....	94
J.2	Generic test program .....	94
J.3	Definitions .....	97
J.4	Principle of assessment and pass/fail criteria .....	98
<b>Annex K (normative) Dynamometer Test program to detect the formation of metal pick-up at the brake block .....</b>		<b>99</b>
K.1	Test program for freight wagons with brake blocks type K and LL .....	99
K.2	Test program for locomotives with brake blocks type K .....	101
K.3	Test program for EMU - DMU with brake blocks type K .....	103
K.4	Test program for High speed train with brake blocks type K .....	106
<b>Annex L (normative) Dynamometer test program to demonstrate the extreme winter braking properties .....</b>		<b>109</b>
L.1	Test program for freight wagons with brake blocks type K .....	109
L.2	Test program for freight wagons with brake blocks type LL .....	111
L.3	Specific requirements for conducting Test Programs L.1 and L.2 .....	112
L.4	Process of assessment and pass fail criteria for test programs L.1 and L.2 .....	113
L.5	Generic flow chart to perform test program .....	114
L.6	Detailed flow chart to perform test program (example brake block K) .....	115
<b>Annex M (normative) Test run to demonstrate the extreme winter braking properties brake blocks K - LL for freight wagons .....</b>		<b>118</b>
M.1	General .....	118

M.2	Test conditions .....	118
M.3	Bases for assessment .....	119
M.4	Assessment of measurement data and pass/fail criteria .....	121
Annex N (normative) Dynamometer Test program to simulate "Locked brake" .....		123
N.1	Test program for freight wagons with brake blocks type K and LL .....	123
N.2	Test program for locomotives with brake blocks type K .....	124
N.3	Test program for EMU - DMU with brake blocks type K .....	125
N.4	Test program for High speed train with brake blocks type K .....	126
Annex O (normative) Dynamometer test program to demonstrate the compatibility with track circuits .....		127
O.1	General .....	127
O.2	Short description of the measuring method used .....	127
O.3	Schematic diagram of test set up .....	127
O.4	Flow chart to perform test program .....	129
O.5	Preparation of the disc and the rollers .....	129
O.6	Preparation of the samples of brake block .....	129
O.7	Contamination of disc .....	130
O.8	Measurements .....	131
O.9	Assessment of the results .....	132
Annex P (informative) Vehicle test to demonstrate the compatibility with track circuits .....		134
P.1	General .....	134
P.2	Test conditions .....	134
P.3	Assessment of results .....	135
P.4	Pass/fail criteria .....	136
Annex Q (informative) Dynamometer test program - Determination of static friction coefficient .....		138
Q.1	Test program for freight wagons with brake blocks type K and LL .....	138
Q.2	Test program for EMU - DMU and Locomotive with brake blocks type K .....	139
Q.3	Test program for High speed train with brake blocks type K .....	140
Q.4	Specific Requirements for conducting dynamometer test programmes Q.1 to Q.3 .....	140
Annex R (informative) Dynamometer test program - Simulation of service conditions for freight wagons .....		143
R.1	Simulation freight wagon with brake block type K 2Bgu .....	143
R.2	Simulation freight wagon with brake block type LL 2Bgu .....	145
Annex S (normative) Interchangeability, rejection lugs and critical dimensions .....		148
Annex T (normative) Brake block shear and flexural strength tests .....		151
T.1	General .....	151
T.2	Shear strength test .....	151
T.3	Flexural strength test .....	152
Annex U (normative) Limitation of permissible mechanical damage of brake block .....		154
U.1	General .....	154
U.2	Cracked through to back-plate .....	154
U.3	Crumbling of the friction material .....	155
U.4	Metal pick-up .....	155
U.5	Detachment from back-plate .....	156
U.6	Cracks in the direction of wheel circumference .....	156
U.7	Detachment of the friction material .....	156
U.8	Interface with the brake block holder .....	156

<b>Annex V (normative) In service assessment of brake block .....</b>	<b>158</b>
<b>V.1 General .....</b>	<b>158</b>
<b>V.2 Freight wagon .....</b>	<b>158</b>
<b>V.3 Coach .....</b>	<b>159</b>
<b>V.4 Locomotive .....</b>	<b>159</b>
<b>V.5 EMU-DMU .....</b>	<b>160</b>
<b>V.6 High speed train .....</b>	<b>160</b>
<b>V.7 Description of areas to be monitored and additional measures .....</b>	<b>161</b>
<b>V.8 Pass/fail criteria .....</b>	<b>162</b>
<b>Annex W (informative) Complementary definitions and abbreviations .....</b>	<b>163</b>
<b>Annex X (informative) Brake block characterization test .....</b>	<b>165</b>
<b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC .....</b>	<b>166</b>
<b>Bibliography .....</b>	<b>169</b>
