4.8.8	Other specific formulae for the calculation of stopping distance .....	45
4.9	Supplementary dynamic calculations .....	45
4.9.1	General .....	45
4.9.2	Mass to be braked (mB) .....	46
4.9.3	Braking energy .....	46
4.9.4	Maximum braking power of each brake equipment type .....	48
4.9.5	Maximum specific power flux for each type of friction brake .....	48
4.10	Specific expressions of braking performance .....	49
4.10.1	General .....	49
4.10.2	Braked weight percentage ( ) .....	49
4.10.3	Braked weight .....	49
4.10.4	Braking ratio .....	49
4.10.5	Equivalent brake force .....	49
5	Immobilization brake calculation .....	49
5.1	General .....	49
5.2	General characteristics .....	49
5.3	Static coefficient of friction .....	50
5.4	Train and operating characteristics .....	50
5.5	Immobilization force provided by equipment type .....	50
5.5.1	General .....	50
5.5.2	Force of a screw hand brake (Tread brake) .....	51
5.5.3	Force of a screw hand brake (Disc brake) .....	51
5.5.4	Force of a tread brake unit .....	51
5.5.5	Force of a disc brake unit arrangement .....	52
5.5.6	Force of a permanent magnetic track brake .....	52
5.6	Immobilization force for each axle .....	53
5.7	Total immobilization force per train .....	53
5.8	Immobilization safety factor .....	54
5.9	Coefficient of adhesion required by each braked axle .....	54
5.10	Maximum achievable gradient .....	55
Annex A (informative) Workflow of stopping and slowing distance calculation method .....		56
Annex B (informative) Workflow of immobilization calculations .....		58
Annex C (informative) Brake equipment type example calculations .....		59
Annex D (informative) Train stopping distance and immobilization brake calculation example .....		71
D.1	General .....	71
D.2	Train stopping calculations .....	72
D.3	Train stopping calculations on a gradient .....	74
D.4	Train immobilization (parking) brake calculations .....	74
Annex E (informative) Development of the formula for the mean brake force with respect to the braking distance .....		76
Annex F (informative) Slowing or stopping distance calculation using alternative method of equivalent response time calculation as French Railway requirements in particular for trains operating in 'G' position .....		77
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC .....		79
Bibliography .....		82
