DIN EN 16704-2-2:2017-03 (E)

Railway applications - Track - Safety protection on the track during work - Part 2-2: Common solutions and techn ology - Requirements for barriers

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Specification of barriers 8

5 Requirements for barriers 9
5.1 General 9
5.2 Horizontal components 10
5.3 Mounting of horizontal components at different transversal distances 10
5.4 Extendable devices 11
5.5 Track gauge requirements 11
5.6 Height 11
5.7 Material 14
5.7.1 General 14
5.7.2 Special requirements for steel 14
5.7.3 Special requirements for timber 14
5.7.4 Material for weights and counterweights 14

6 Test methods for stability requirements 14
6.1 General 14
6.2 Applying the loads 14
6.3 Description of sample erection 15
6.4 Tests for conformity with load requirements 16
6.4.1 General 16
6.4.2 Tests for deflection 16
6.4.3 Oscillation 20
6.4.4 Vibrations 21
6.4.5 Aerodynamics 21
6.5 Nets and protective plates 22
6.6 Electrical requirements 22
6.6.1 General requirements 22
6.6.2 Electrical resistance for horizontal components (guard rails) 22
6.6.3 Electrical resistance for vertical components (post) 22
6.6.4 Electrical requirements for 3rd rail 22
6.7 Marking 22
6.8 Test reports 23
6.9 Additional requirements for barriers in case of 3rd rail 23

7 Requirements for marking (visual demarcation line) 24

8 System approval 24

9 User manual 24

Annex A (informative) Special national conditions 26

Annex B (informative) Operational distance of barriers 28
