

DIN EN 16704-2-2:2017-03 (E)

Railway applications - Track - Safety protection on the track during work - Part 2-2: Common solutions and technology - Requirements for barriers

Contents		Page
European foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	6
4	Specification of barriers	8
5	Requirements for barriers	9
5.1	General	9
5.2	Horizontal components	10
5.3	Mounting of horizontal components at different transversal distances	10
5.4	Extendable devices	11
5.5	Track gauge requirements	11
5.6	Height	11
5.7	Material	14
5.7.1	General	14
5.7.2	Special requirements for steel	14
5.7.3	Special requirements for timber	14
5.7.4	Material for weights and counterweights	14
6	Test methods for stability requirements	14
6.1	General	14
6.2	Applying the loads	14
6.3	Description of sample erection	15
6.4	Tests for conformity with load requirements	16
6.4.1	General	16
6.4.2	Tests for deflection	16
6.4.3	Oscillation	20
6.4.4	Vibrations	21
6.4.5	Aerodynamics	21
6.5	Nets and protective plates	22
6.6	Electrical requirements	22
6.6.1	General requirements	22
6.6.2	Electrical resistance for horizontal components (guard rails)	22
6.6.3	Electrical resistance for vertical components (post)	22
6.6.4	Electrical requirements for 3rd rail	22
6.7	Marking	22
6.8	Test reports	23
6.9	Additional requirements for barriers in case of 3rd rail	23
7	Requirements for marking (visual demarcation line)	24
8	System approval	24
9	User manual	24

Annex A (informative) Special national conditions	26
Annex B (informative) Operational distance of barriers	28
Bibliography	29
