

# DIN EN 14198:2017-03 (E)

## Railway applications - Braking - Requirements for the brake system of trains hauled by locomotives

---

| <b>Contents</b>         |   | <b>Page</b> |
|-------------------------|---|-------------|
| European foreword ..... |   | 4           |
| 1                       | Scope .....   | 5           |
| 2                       | Normative References .....                              | 5           |
| 3                       | Terms and definitions .....                             | 7           |
| 4                       | Symbols and abbreviations .....                         | 9           |
| 5                       | Requirements .....                                      | 9           |
| 5.1                     | General requirements of the train braking system .....  | 9           |
| 5.2                     | General safety requirements .....                       | 10          |
| 5.2.1                   | Design principles .....                                 | 10          |
| 5.2.2                   | Fire protection .....                                   | 11          |
| 5.2.3                   | Environmental condition .....                           | 11          |
| 5.3                     | Requirements of the main brake system .....             | 12          |
| 5.3.1                   | General requirements .....                              | 12          |
| 5.3.2                   | General functions on train level .....                  | 13          |
| 5.3.3                   | Additional requirements at the vehicle level .....      | 18          |
| 5.4                     | "EN-UIC" brake system - based on air brake system ..... | 20          |
| 5.4.1                   | Foreword .....  | 20          |
| 5.4.2                   | General architecture .....                              | 20          |
| 5.4.3                   | Additional brake systems .....                          | 22          |
| 5.4.4                   | Functional requirements at train level .....            | 22          |
| 5.4.5                   | Design requirements .....                               | 35          |
| 5.4.6                   | Brake functions at vehicle level .....                  | 36          |
| 5.5                     | Direct EP brake control .....                           | 41          |
| 5.6                     | Additional brake systems .....                          | 41          |
| 5.6.1                   | Dynamic brakes .....                                    | 41          |
| 5.6.2                   | Direct brake .....                                      | 44          |
| 5.6.3                   | Magnetic Track brake .....                              | 46          |
| 5.7                     | Brake management .....                                  | 46          |
| 5.7.1                   | Brake blending at vehicle level .....                   | 46          |
| 5.7.2                   | Manual mode .....                                       | 46          |
| 5.7.3                   | Brake blending at train level .....                     | 46          |
| 5.7.4                   | Jerk / ramps .....                                      | 47          |
| 5.8                     | Wheel slide protection .....                            | 48          |
| 5.9                     | Compressed air supply .....                             | 49          |
| 5.9.1                   | General requirements .....                              | 49          |
| 5.9.2                   | Capacity .....  | 49          |
| 5.9.3                   | Air quality .....                                       | 49          |
| 5.10                    | Enhancement of wheel/rail adhesion .....                | 49          |
| 6                       | Performances .....                                      | 50          |
| 6.1                     | General aspects .....                                   | 50          |
| 6.2                     | Performance calculation .....                           | 51          |
| 6.2.1                   | General .....   | 51          |
| 6.2.2                   | Calculations for nominal mode .....                     | 52          |
| 6.2.3                   | Equivalent response and delay time .....                | 53          |
| 6.2.4                   | Calculations for degraded mode .....                    | 53          |

|   |  |           |
|---|--|-----------|
| 6.2.5   | Calculations for degraded conditions ..... | 53        |
| 6.3   | Relevant load conditions .....             | 53        |
| 6.3.1   | Locomotives .....                          | 53        |
| 6.3.2   | Coaches .....                              | 53        |
| 6.3.3   | Wagons .....                               | 54        |
| 6.4   | Service braking .....                      | 54        |
| 6.5   | Thermal capacity .....                     | 55        |
| 6.6   | Adhesion .....                             | 55        |
| 6.6.1   | General requirements .....                 | 55        |
| 6.6.2   | Emergency brake application .....          | 56        |
| 6.6.3   | Service brake application .....            | 56        |
| 6.7   | Parking brake performance .....            | 56        |
| <b>Annex A (normative) Vehicle requirements .....</b>   |  | <b>57</b> |
| <b>Annex B (informative) Train related brake performance categories .....</b>   |  | <b>59</b> |
| <b>Annex C (informative) Explanation of "proven design" concept .....</b>   |  | <b>63</b> |
| <b>Annex D (informative) Corresponding standards EN - UIC .....</b>   |  | <b>64</b> |
| <b>Annex E (normative) Brake pipe pressure control system .....</b>   |  | <b>66</b> |
| E.1   | General requirements .....                 | 66        |
| E.2   | Release position .....                     | 67        |
| E.3   | Service brake application .....            | 68        |
| E.4   | Emergency brake application .....          | 68        |
| E.5   | Overcharge function .....                  | 69        |
| E.6   | Quick release function .....               | 70        |
| <b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC .....</b> |  | <b>74</b> |
| <b>Bibliography .....</b>   |  | <b>78</b> |
