

# DIN EN 16860:2019-06 (E)

## Railway applications - Requirements and general principles for securing payload in rail freight transport

---

Contents	Page
European foreword .....	3
1 Scope .....	4
2 Normative references .....	4
3 Terms and definitions .....	4
4 Requirements for securing of payload .....	5
4.1 General .....	5
4.2 Requirements that arise from the following influencing factors .....	6
4.2.1 Type of wagon and operation .....	6
4.2.2 Infrastructure .....	6
4.2.3 Payload .....	6
4.2.4 Loads .....	6
5 Methods/Principles for loading and securing of payload .....	7
5.1 General .....	7
5.2 Positive-fit payload securing .....	8
5.3 Force-fit payload securing .....	8
5.4 Controlled sliding payload securing .....	9
6 Securing equipment .....	10
6.1 General .....	10
6.2 Payload restraint and fixing .....	10
6.3 Anchor points .....	11
Annex A (informative) Type, number and position of payload securing devices .....	12
Annex B (normative) Assessment methods of the loading and securing of the payload .....	16
B.1 General .....	16
B.2 Impact tests for loading methods and removable fastenings .....	16
B.2.1 General .....	16
B.2.2 Test conditions .....	16
B.2.3 Impact wagon .....	16
B.2.4 Test wagon .....	17
B.2.5 Measurement of impact speeds .....	17
B.2.6 Assessment of the results .....	17
B.2.7 Conversion table .....	18
B.3 Simulation method .....	18
B.3.1 Input datas .....	18
B.3.2 Simulation code .....	18
B.3.3 Acceptation criteria .....	18
Annex ZA (informative) Relationship between this European Standard and the essential Requirements of EU Directive 2008/57/EC aimed to be covered .....	19
Bibliography .....	20
