DIN EN 13231-2:2021-03 (E)

Railway applications - Track - Acceptance of works - Part 2: Acceptance of reprofiling rails in plain line, switches, crossings and expansion devices

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Longitudinal profile 13
4.1 Principle 13
4.2 Measurements required 13
4.3 Acceptance criteria for longitudinal profile 14
4.3.1 General 14
4.3.2 Peak-to-peak limit 14

5 Transverse profile 15
5.1 Principle 15
5.2 Areas in switches and crossings which are limited for reprofiling 15
5.3 Measurements required 15
5.4 Acceptance criteria for the transverse profile 16

6 Metal removal 17
6.1 Measurements required 17
6.2 Acceptance criteria for metal removal 17

7 Surface quality 18

8 Visual appearance: acceptance criteria 18

9 Rolling contact fatigue 18

Annex A (normative) Calculation of peak-to-peak values 19

A.1 Calculation of the percentage of exceedances 19

Annex B(normative) Method of periodic verification 21

B.1 Method of periodic verification of approved instruments 21
B.2 Longitudinal profile 21
B.3 Transverse profile 23

Annex C(normative) Procedures to verify reference instruments 28

C.1 Longitudinal profile 28
C.2 Transverse profile 36

Annex D(normative) Procedures to demonstrate correlation of approved and reference instruments 38

D.1 Longitudinal profile 38
D.2 Transverse profile 41

D.3 Surface quality 49

Annex E(normative) Calculation of cumulative density function and power spectral density (PSD) of the amplitude of the longitudinal profile 51

E.1 Calculation of cumulative density function of the amplitude of the longitudinal profile 51
E.2 Calculation of the power spectral density of the amplitude of the longitudinal profile 53

Annex F(normative) Rail surface quality measurement 55

F.1 Requirements 55
F.2 Calculation of the quality index (QI) 55
F.3 Verification of the functional capability 56
F.4 Verification of the functional capability 56
F.5 Coordinate measuring machine (CMM) 57
F.6 Measurement of the comparison standard using the CMM 57
F.7 Analysis of data from CMM 57
F.8 Measurement of the comparison standard using the test instrument 57
F.9 Maximum deviation between test instrument and CMM 57
