DIN EN 13481-5:2022-11 (E)

Railway applications - Track - Performance requirements for fastening systems - Part 5: Fastening systems for ballastless tracks

Contents

Page

European foreword 3

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Symbols 9

5 Requirements determined by laboratory testing 9
5.1 Specimens used for laboratory testing 9
5.2 Longitudinal rail restraint or longitudinal stiffness 10
5.2.1 General case 10
5.2.2 Special case for long structures 10
5.3 Clamping force and uplift stiffness 10
5.4 Vertical stiffness 11
5.5 Effect of repeated loading 11
5.6 Electrical resistance of the fastening system and slab track elements 12
5.7 Effect of exposure to severe environmental conditions (surface mounted rails only) 13
5.8 Anchoring fastening components 13
5.8.1 Cast-in or glued-in components in concrete supporting elements 13
5.8.2 Anchoring components on steel supporting elements 13

6 Other requirements 13
6.1 Dimensions 13
6.2 Effect of fastening system tolerances on track gauge 14
6.3 In-service testing 15
6.4 Attenuation of noise and vibration 15

7 Fitness for purpose 16

8 Marking, labelling and packaging 16

Annex A (informative) Vibration and noise 17

A.1 General 17
A.2 Symbols 17
A.3 Parameters for environmental vibration calculations 17
A.4 Calculating the vibration attenuation 18
A.5 Environmental noise 18
