| 5.1                     | General requirements .....  | 9           |
| 5.1.1                   | Safety .....  | 9           |
| 5.1.2                   | Fire protection .....   | 11          |
| 5.1.3                   | Reliability and availability .....                                  | 12          |
| 5.1.4                   | Environmental condition .....                                       | 12          |
| 5.1.5                   | Train configuration .....   | 12          |
| 5.1.6                   | Maximum speed and line parameters .....                             | 12          |
| 5.1.7                   | Coupling compatibility/capability .....                             | 12          |
| 5.1.8                   | Longitudinal track forces .....                                     | 13          |
| 5.1.9                   | EMC .....   | 13          |
| 5.1.10                  | Operation in very long tunnels .....                                | 13          |
| 5.2                     | Applicable brakes .....   | 13          |
| 5.2.1                   | Basic architecture for high speed braking .....                     | 13          |
| 5.2.2                   | Dynamic brakes .....  | 14          |
| 5.2.3                   | Friction brakes .....   | 14          |
| 5.2.4                   | Magnetic track brakes .....   | 14          |
| 5.2.5                   | Non conventional brakes .....                                       | 15          |
| 5.3                     | Dynamic brakes .....  | 15          |
| 5.3.1                   | General aspect .....  | 15          |
| 5.3.2                   | Electro-dynamic brake (depending on the catenary in function) ..... | 16          |
| 5.3.3                   | Rheostatic brake .....  | 16          |
| 5.3.4                   | Control Command of the electro-dynamic brakes .....                 | 16          |
| 5.3.5                   | Brake resistors .....   | 17          |
| 5.3.6                   | Hydrodynamic brake .....  | 17          |
| 5.4                     | Friction brake .....  | 17          |
| 5.4.1                   | General .....   | 17          |
| 5.4.2                   | Control command .....   | 18          |
| 5.4.3                   | Installation of the brake equipment .....                           | 19          |
| 5.4.4                   | Leakage .....   | 19          |
| 5.4.5                   | Mechanical components/bogie equipment .....                         | 20          |
| 5.5                     | Eddy current brake .....  | 21          |
| 5.6                     | Magnetic track brake .....  | 23          |
| 5.7                     | Non conventional brakes .....                                       | 24          |
| 5.8                     | Emergency brake concept .....                                       | 24          |
| 5.8.1                   | General .....   | 24          |
| 5.8.2                   | General architecture .....  | 24          |
| 5.8.3                   | Demand phase .....  | 25          |
| 5.8.4                   | Collecting and distributing brake command signals .....             | 27          |
| 5.9                     | Service braking .....   | 28          |
| 5.9.1                   | Brake management - Brake blending .....                             | 28          |

|  |   |    |
|--|---|----|
| 5.9.2  | Brake command .....                                     | 29 |
| 5.9.3  | Signal processing .....                                 | 31 |
| 5.9.4  | ATC Automatic train control system (optional) .....     | 32 |
| 5.9.5  | Combined braking with two brake handles .....           | 32 |
| 5.9.6  | Jerk / Ramps .....                                      | 32 |
| 5.9.7  | Coupling/Decoupling .....                               | 32 |
| 5.10   | Wheel slide protection and locked wheel detection ..... | 33 |
| 5.10.1   | General .....   | 33 |
| 5.10.2   | Wheel slide protection .....                            | 33 |
| 5.10.3   | Locked wheel monitoring system .....                    | 34 |
| 5.11   | Parking brake .....                                     | 34 |
| 5.12   | Location of the control devices .....                   | 36 |
| 5.12.1   | Driver's cab .....                                      | 36 |
| 5.12.2   | Operating devices others than in the cab .....          | 37 |
| 5.13   | Brake indicators .....                                  | 38 |
| 5.14   | Fault monitoring and diagnostics .....                  | 39 |
| 5.15   | Driver's brake test .....                               | 41 |
| 5.15.1   | General .....   | 41 |
| 5.15.2   | Regular basic brake test .....                          | 41 |
| 5.15.3   | Full brake test .....                                   | 42 |
| 5.15.4   | Realization of brake tests .....                        | 43 |
| 5.16   | Power supply .....                                      | 43 |
| 5.16.1   | Air pressure supply .....                               | 43 |
| 5.16.2   | Electrical energy supply .....                          | 44 |
| 5.17   | Enhancement of wheel-rail adhesion .....                | 44 |
| 5.18   | Maintenance .....                                       | 45 |
| 6  | Brake performance .....                                 | 45 |
| 6.1  | General .....   | 45 |
| 6.2  | Emergency braking .....                                 | 46 |
| 6.2.1  | General .....   | 46 |
| 6.3  | Service braking .....                                   | 46 |
| 6.4  | Thermal requirements .....                              | 47 |
| 6.5  | Adhesion values .....                                   | 47 |
| Annex A (informative) Passenger alarm system .....   |   | 49 |
| Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive (EU) 2016/797 aimed to be covered ..... |   | 51 |
| Bibliography .....   |   | 53 |
