

# DIN EN 15085-3:2023-02 (E)

## Railway applications - Welding of railway vehicles and components - Part 3: Design requirements

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		6
1	Scope.....	7
2	Normative references.....	7
3	Terms and definitions.....	9
4	Design requirements .....	9
4.1	General.....	9
4.2	Dimensioning of welded joints .....	10
4.3	Stress categories and stress factors .....	10
4.4	Safety categories .....	10
4.5	Weld performance classes.....	10
4.6	Weld inspection classes.....	11
5	Quality levels for imperfections .....	12
5.1	General.....	12
5.2	Quality levels for imperfections for fusion welded joints (beam welding excluded) .....	12
5.3	Quality levels for imperfections for beam welded joints .....	13
5.3.1	General.....	13
5.3.2	Quality levels for imperfection for friction stir welding.....	14
5.3.3	Quality levels for imperfections for stud welding related to the weld performance class.....	14
5.3.4	Quality requirements for resistance spot welding, projection welding and resistance seam welding related to the weld performance class .....	14
5.3.5	Quality requirements for flash welding.....	14
5.3.6	Defining quality requirements for other welding processes.....	15
6	Selection of parent metals and welding consumables .....	15
6.1	Selection of parent metals .....	15
6.2	Selection of welding consumables.....	15
7	Weld joint design .....	16
7.1	General.....	16
7.2	Design guidelines.....	16
7.2.1	Fabricated box sections.....	16
7.2.2	Butt welds on parts of dissimilar thickness .....	17
7.2.3	Plug welds and slot welds.....	18
7.2.4	Proximity of two joints.....	19
7.2.5	Stiffeners welded across a butt weld .....	19
7.2.6	Openings .....	20
7.2.7	Design guidelines for stiffeners and gussets ends .....	20
7.2.8	Gusset shape .....	20
7.2.9	Weld return.....	21
7.2.10	Fillet weld .....	22
7.2.11	Use of run-on and run-off plates.....	23
7.2.12	Highly restrained joints.....	23

7.2.13	Mixing of joining techniques.....	24
7.2.14	Prevention of corrosion problems .....	25
7.2.15	Intermittent welds.....	25
7.3	Joint preparation.....	26
7.4	Methods to improve the fatigue strength (Post weld improvement) .....	26
7.4.1	General.....	26
7.4.2	Improvement of shape of weld toe .....	27
7.4.3	Post Weld Heat Treatment (PWHT) — stress relief.....	27
7.4.4	Introduction of compressive stress.....	28
8	Design documentation related to welding.....	28
8.1	Information on design drawings or documentation linked to the drawings .....	28
8.2	Design review of welded components.....	30
8.3	Use of existing drawings not according to EN 15085 .....	30
	Annex A (informative) List of welded joints (example) .....	31
	Annex B (informative) Joint preparation of welds .....	32
	Annex C (informative) Joint preparation for plug welds .....	40
	Annex D (informative) Types of joints in relation to stresses and inspection classes.....	41
	Annex E (informative) Flash welding.....	42
	Annex F (normative) Resistance spot, seam and projection welding .....	45
F.1	General.....	45
F.2	Minimum shear pull forces.....	50
	Annex G (informative) Determination of safety category for welded joints .....	52
	Annex ZA (informative) Relationship between this European Standard and the Essential requirements of Directive (EU) 2016/797 aimed to be covered.....	53
	Bibliography.....	56
