|-----------------|---|-------------|
|                 | <b>Foreword</b> .....   | <b>v</b>    |
|                 | <b>Introduction</b> .....                                       | <b>vi</b>   |
| <b>1</b>        | <b>Scope</b> .....  | <b>1</b>    |
| <b>2</b>        | <b>Normative references</b> .....                               | <b>1</b>    |
| <b>3</b>        | <b>Terms and definitions</b> .....                              | <b>1</b>    |
| <b>4</b>        | <b>Symbols and abbreviated terms</b> .....                      | <b>3</b>    |
| <b>5</b>        | <b>Determination of test loads</b> .....                        | <b>4</b>    |
| 5.1             | General.....  | 4           |
| 5.2             | Loads for sleepers and bearers in track.....                    | 4           |
| 5.2.1           | Loads.....  | 4           |
| 5.2.2           | Load distribution.....  | 5           |
| 5.2.3           | Characteristic bending moments.....                             | 5           |
| 5.3             | Test loads.....   | 5           |
| 5.3.1           | General.....  | 5           |
| 5.3.2           | Method A: verification of bending capacities.....               | 5           |
| 5.3.3           | Method B: verification of minimum performance requirements..... | 6           |
| <b>6</b>        | <b>Data to be supplied</b> .....                                | <b>6</b>    |
| 6.1             | General.....  | 6           |
| 6.2             | Data to be supplied by the purchaser.....                       | 6           |
| 6.3             | Data to be provided by the supplier.....                        | 7           |
| 6.3.1           | Before the design approval tests.....                           | 7           |
| 6.3.2           | After the design approval tests.....                            | 7           |
| 6.3.3           | Prior to start-up of production.....                            | 7           |
| <b>7</b>        | <b>Materials</b> .....  | <b>8</b>    |
| 7.1             | General requirements.....                                       | 8           |
| 7.2             | Cement.....   | 8           |
| 7.3             | Aggregates.....   | 8           |
| 7.4             | Mixing water.....   | 9           |
| 7.5             | Admixtures.....   | 9           |
| 7.6             | Concrete.....   | 9           |
| 7.6.1           | Material requirements.....                                      | 9           |
| 7.6.2           | Information to be provided by the supplier.....                 | 10          |
| 7.6.3           | Changes for the material and processes.....                     | 10          |
| 7.7             | Steel.....  | 10          |
| 7.7.1           | Prestressing tendons.....                                       | 10          |
| 7.7.2           | Reinforcing steel.....  | 10          |
| 7.7.3           | Steel connecting bar for twin-block sleepers.....               | 10          |
| 7.8             | Embedded components.....  | 11          |
| <b>8</b>        | <b>General requirements</b> .....                               | <b>11</b>   |
| 8.1             | Design.....   | 11          |
| 8.1.1           | Geometrical design.....   | 11          |
| 8.1.2           | Concrete cover.....   | 13          |
| 8.1.3           | Prestressing system design.....                                 | 13          |
| 8.1.4           | Reinforcing steel design.....                                   | 14          |
| 8.2             | Manufacturing process.....                                      | 14          |

|   |  |           |
|---|--|-----------|
| 8.2.1   | General requirements                           | 14        |
| 8.2.2   | Manufacturing rules                            | 14        |
| 8.2.3   | Curing   | 15        |
| 8.2.4   | Concrete and ambient temperature               | 15        |
| 8.3   | Surface finish                                 | 17        |
| 8.4   | Marking  | 17        |
| <b>9</b>  | <b>Product testing</b>                         | <b>18</b> |
| 9.1   | General  | 18        |
| 9.2   | Mechanical parameters                          | 18        |
| 9.3   | Tests on product                               | 19        |
| 9.4   | Tests on concrete                              | 19        |
| 9.5   | Tests in combination with the fastening system | 19        |
| 9.6   | Additional tests                               | 19        |
| <b>10</b>   | <b>Quality control</b>                         | <b>19</b> |
| 10.1  | General  | 19        |
| 10.2  | Quality control during design approval tests   | 20        |
| 10.3  | Quality control during manufacturing           | 20        |
| <b>Annex A (informative) Determination of factor <math>k_t</math> for time dependent losses of strength</b>   |  | <b>22</b> |
| <b>Annex B (informative) Calculation of the bending capacity by method A</b>  |  | <b>24</b> |
| <b>Annex C (informative) Determination and application of minimum performance requirements and related test loads from experience in track for method B</b> |  | <b>26</b> |
| <b>Annex D (informative) Correspondence between relevant regional or national standards</b>   |  | <b>30</b> |
| <b>Annex E (informative) Test method for measuring the water absorption of concrete at atmospheric pressure</b>   |  | <b>32</b> |
| <b>Annex F (informative) Definition and recommendation for measurement of rail seat inclination and twist between rail seats</b>                            |  | <b>33</b> |
| <b>Annex G (informative) Surface finish</b>   |  | <b>34</b> |
| <b>Annex H (informative) Quality control during manufacturing – Routine tests and frequency of testing</b>  |  | <b>36</b> |
| <b>Bibliography</b>   |  | <b>38</b> |
