ISO 4975:2022-06 (E)

Railway applications - Braking system - Quality of compressed air for pneumatic apparatus and systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Units and abbreviated terms 2
4.1 Units 2
4.2 Abbreviated terms 2

5 Compressed air system 2
5.1 General 2
5.2 Breakdown of the system into functional units 2

6 Characteristics of the devices constituting the functional units 3
6.1 Air generation and treatment unit (AGTU) 3
6.1.1 Air intake 3
6.1.2 Production of compressed air 3
6.1.3 Treatment of compressed air 3
6.2 Compressed air storage and distribution 3
6.3 Use of compressed air for the brake 3
6.4 Use of compressed air for auxiliary devices 4

7 Determination of the air quality classes 4

8 Air quality classes 5
8.1 Reference conditions 5
8.2 Characteristics of quality classes 6
8.3 Designation of the compressed air purity 7
8.4 Application to the pneumatic system of a rail vehicle 8

Annex A (informative) Contaminants 9

Annex B (informative) Demonstration of air quality during life cycle 10

Annex C (informative) Example for temperature range 12

Bibliography 13
